VITAL SEEDS

2027 Organic Seed Catalogue

SOIL ASSOCIATION ORGANIC

About this catalogue

We are an online shop, as such this catalogue is for reference only, for more detailed and up to date information, and to place your order please visit our website - vitalseeeds.co.uk.

Large Packs - some of our varieties are available in large packs (roughly four times regular packet size). The price of a large pack is indicated next to the regular packet price throughout the catalogue.

Growing your own food is a powerful act of self-reliance in a world where we are encouraged to buy everything we need (and lots that we don't) from external sources. Saving your own seed goes one step further, and part of our mission is to share what we know about saving seeds with others. We believe it is our duty as gardeners and growers to learn about this process, otherwise we leave the control of our precious food system in the hands of others.

You can find useful growing and seed saving resources on our website.

All the best, and happy growing for the coming season.

Fred, Ronja and the rest of the team

VEGETABLES

AGRETTI

AGRETTI (ORGANIC) (MSAg) **£2.05 - 4.00**

Salsola soda

A leafy Italian delicacy, can be eaten raw or cooked. Agretti is a popular Italian leaf which is slowly becoming more popular in the UK particularly with chefs. Its flavour could be described as 'chivey samphire' and is slightly salty. It can be lightly steamed, stirred through pasta, or added raw to salads to add an interesting twist. The seeds are only viable for a few months - they are actually little plants not strictly seeds. *(Average seed count in regular packet - 100)*

ASIAN GREENS

BABY CHOI (ORGANIC) (OrPC) **£1.68 - 3.80**

Brassica rapa

A delightful minature version of pak choi, Baby Choi is perfect for those seeking a quick and tender Asian green. This versatile brassica offers a mild, sweet flavour with a satisfying crunch, making it ideal for stir-fries, salads and steamed as a side dish. Ready to harvest in just 30 days after planting, it can be picked as a whole plant or leaf by leaf for prolonged harvests. Keep Baby Choi well-watered, especially during hot weather, to prevent it from bolting. *(Average seed count in regular packet - 200)*

GIANT RED MUSTARD (ORGANIC) (OrGR) **£1.80**

Brassica juncea

The young leaves are of a succulent, delicate and peppery flavour. When harvested fully matured, the leaves might surprise you with their bold flavour. When cooked or steamed like other greens however the taste will be mild and similar to spinach or chard. Giant Red Mustard seeds are also excellent for sprouting. *(Average seed count in regular packet - 330)*

KIZUNA MIX (ORGANIC) (OrKz) **£1.85**

Brassica napus

A diverse population derived from a cross between a kale and mizuna. Delicate leaves suited to both eating raw in salad and being cooked like spinach. This is a diverse breeding population derived from a cross between Dazzling Blue Kale and Beni Houshi Mizuna. We found the first individual of this cross between where the two parents had been flowering. These seeds are from the F2 generation which means the second generation after the original cross happened. There is a beautifully diverse mix of quite round leaves, and very feathery and frilly leaves and everything in between. *(Average seed count in regular packet - 200)*

MIZUNA (ORGANIC) (OrMz) **£1.68**

Brassica rapa

Mizuna has a mild piquant almost peppery taste and can be used raw in salads and also as a cooked green. It is highly resistant to the cold and can be grown throughout the winter, making those cold, short days and long nights feel healthier and a little bit spicier! The pretty yellow sprays of flowers can also be a bright addition to a salad with the same mustardy hit. *(Average seed count in regular packet - 275)*

Asian Greens continued...

MIZUNA - "BENI HOUSHI" (ORGANIC) (OrBH) **£1.90 - 3.90**

Brassica rapa

This beautiful new mizuna variety is apparently taking the Japanese foody-scene by storm! It's similar in taste to green mizuna and is delicious raw in salads or cooked in stir-fries.

With its contrasting colour scheme it's a real head-turner and is certain to impress. *(Average seed count in regular packet - 180)*

PURPLE FRILLS (ORGANIC) (OrPF) **£1.88 - 3.80**

Brassica juncea

Purple Frills has beautiful burgundy tinged, spidery leaves. It adds interest to any salad with its hot mustardy flavour. It can also be cooked and used a spicy spinach alternative. It is abundant in its growth and will continue throughout the coldest weather. *(Average seed count in regular packet - 250)*

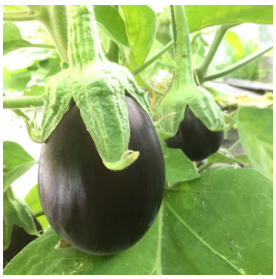

TATSOI (ORGANIC) (OrTS) **£1.68**

Brassica rapa

Tat Soi produces leaves with a mild mustard flavour and a crunchy texture that can be used raw as a delicious addition to a salad or cooked in a variety of ways. It is a fast growing variety that can be cut at any stage. If the baby leaves are left to mature they become a stunning rosette of broad round greens with a wide, crisp and juicy central stem. *(Average seed count in regular packet - 300)*

AUBERGINE

BLACK BEAUTY (ORGANIC) (AuBB) **£2.10**

Solanum melongena

Black Beauty is as good as its hybrid sister varieties! In the right conditions (light, greenhouse/polytunnel) they fruit abundantly and the plants grow tall and strong. The aubergines themselves are all shapes, sizes and shades of purple which prove popular at markets or in the kitchen! They fruit early to mid season with aubergines from July - September. This is our favourite variety to grow, and most importantly the fruit tastes fab! *(Average seed count in regular packet - 18)*

CESKY RANY (ORGANIC) (AuCR) **£2.10**

Solanum melongena

Robust plants producing early violet fruits that have aromatic light green flesh. It is an old variety originating in Czechia with "rany" literally translating to "early". It is robust, productive and can deal with colder conditions than other aubergines. In the warmer and drier areas of the country it will even do well grown outdoors. *(Average seed count in regular packet - 20)*

Aubergine continued...

EARLY BLACK EGG (ORGANIC) (AuBE) **£2.10**

Solanum melongena

An early variety with distinctive jet-black tear-shaped fruits. Early black egg is an ideal variety for growing outdoors and in pots and produces an abundance of fruits even in cooler/shorter growing seasons. With a distinctive black calyx and creamy yellow flesh it's sure to stand out in your garden and kitchen. *(Average seed count in regular packet - 18)*

BEETROOT

BOLTARDY (ORGANIC) (BeBo) **£2.33 - 3.95**

Beta vulgaris

Boltardy is a winner of the RHS Award of Garden Merit and has a well earned reputation for being a real 'workhorse' variety. Many large scale growers choose this variety over its modern hybrid cousins for early sowings. We love it as it does exactly what is says on the tin. *(Average seed count in regular packet - 200)*

CHIOGGIA (ORGANIC) (BeCh) **£2.30 - 4.60**

Beta vulgaris

This unusual cultivar has been around since the early 19th century and originates from the coastal town of Chioggia near Venice in Northern Italy. With its delicate flavour and soft flesh it will make an ideal raw addition in salads or as a decorative side dish. When cooked the rings will fade out a little and become pinkish but the beetroot will keep its sweet and mild delicious taste. Definitely our favourite in terms of looks! *(Average seed count in regular packet - 200)*

CYLINDRA (ORGANIC) (BeCy) **£2.30**

Beta vulgaris

Deep purple, and typically 20cm tall, and 6cm diameter, but like any beet, can get very large with enough room. They look great in the veg patch, at the market and also on your plate! Very suitable as a main crop and has excellent storage capability. *(Average seed count in regular packet - 200)*

DETROIT (ORGANIC) (BeDe) **£2.10 - 3.80**

Beta vulgaris

This is a classic variety, having proved itself since 1892 when it was introduced by the D.M. Ferry Seed Company, in Michigan, USA. It is reliable and high-yielding and remains a favourite with gardeners and growers to this day.

The large, globe-shaped beets have the typical beetroot colour and an excellent flavour making it perfect for baking, sautéing, grating into salads, pickling and anything else that you might want to do with a beetroot. Yes, it will also store well! *(Average seed count in regular packet - 200)*

Beetroot continued...

FLAMING BARREL (ORGANIC) (BeBF) **£2.60**

Beta vulgaris

A new golden beet variety specifically bred for its sweet taste and less earthiness. Named after the famous festival in Ottery St Mary,
Flaming Barrel is our new favourite beet and we are very pleased to be able to offer it in our collection.

The roots are elongated and have a deep yellow/orange colour. When cooked they are deliciously sweet. A must have for the veg patch. *(Average seed count in regular packet - 150)*

BLADDER CAMPION

STRIDOLO (ORGANIC) (MSSd) **£2.20**

Silene inflata

An Italian heirloom herb with succulent, aromatic leaves and delicate edible white/pink campion-like flowers. Also known as Sculpit or Bladder Campion, its leaves have a complex flavour profile, combining notes of tarragon, chicory and rocket. Delicious eaten raw in salads or cooked into risottos, soups and omelettes, it's also a pretty addition to the flower garden. While the plant remains edible when in flower, the leaves of older plants become stronger and more bitter - for the best flavour, harvest when the leaves in spring when young and succulent. *(Average seed count in regular packet - 500)*

BROAD BEANS

RATIO (ORGANIC) (BBRa) **£2.90**

Vicia faba

Early, productive broad bean with an excellent pod shape, good pod set and a delicious flavour. Thanks to its branching habit, the crop stays short and is at less risk of lodging. Very flavoursome and suitable for freezing. *(Average seed count in regular packet - 36)*

SUPER AQUADULCE (ORGANIC) (BBSA) **£2.59**

Vicia faba

According to food historian Willam Woys Weaver this variety can be traced back to Vilmorin's selection of a Spanish broad bean called 'haba de Sevilla' in 1885. Super Aquadulce is extra hardy and can withstand cold temperatures. It will produce massive amounts of delicious uniform green pods with large beans. Although especially suited for Autumn sowing, Aquadulce can be sown in early spring for a summer/autumn crop too. *(Average seed count in regular packet - 36)*

BROCCOLI

EARLY PURPLE (ORGANIC) (BrEP) **£2.09**

Brassica oleracea

We love Early Purple broccoli, it comes at a time of year when we are in serious need of some green vegetables that are not kale, chard or leeks! We can quite happily eat it with every meal during its harvest window. It is very versatile, being great seamed, stir fried, roasted, added to soups and stews, put in omelettes... the list goes on.

It is slow growing and takes around one year from sowing to harvest but it is well worth the wait with each plant producing a lot of food. Plants can grow up to 1m in height. *(Average seed count in regular packet - 250)*

Broccoli continued...

FIOLARO DI CREAZZO (ORGANIC) (BrFi) **£2.20**

Brassica oleracea

A traditional Italian type of broccoli sown in summer and harvested in autumn and winter. Broccoli Fiolaro di Creazzo has been cultivated for many centuries in Italy and is on the Slow Food Ark of Taste list which is a living catalogue of delicious and distinctive foods facing extinction. *(Average seed count in regular packet - 150)*

GREEN CALABRESE (ORGANIC) (BRGC) **£2.36**

Brassica oleracaea

Ready for harvest from late summer and into autumn, this is a wonderful variety. Calabrese like other broccoli varieties is hungry and benefits from a good dose of compost for best harvests. *(Average seed count in regular packet - 100)*

PIRACICABA (ORGANIC) (BrPi) **£2.25**

Brassica oleracea

A sweet, flavourful broccoli with many long tender side shoots - perfect for picking over a long period.. A real treat in the garden, the initial central head is relatively small, however it produces an abundance of loose florets with large beads (hence the name cloud broccoli) on long, tender stems which make it ideal for regular harvesting. Thriving in warmer conditions where other broccolis might struggle, it's a brilliant choice for extending your season. We grew it in 2024 and absolutely loved it, it was one of those crops we were always happy to see more of. *(Average seed count in regular packet - 150)*

RUDOLPH (ORGANIC) (BrRu) **£2.20**

Brassica oleracea

A famous extra-early variety producing delicious tender spears as early as October . Rudolph is a fantastic variety and we are really happy to be offering it in our catalogue. Our selection was from a huge population we had access to so the genetics are extremely strong.

It is one of the few open-pollinated broccoli varieties which large scale veg growers still use, along side their hybrid counterparts. *(Average seed count in regular packet - 100)*

BRUSSELS SPROUTS

GRONINGER (ORGANIC) (BSGr) **£2.35**

Brassica oleraceae

Groninger is a great-tasting Brussel sprout variety, with improving flavour as the cold draws in. It is an ideal choice for your garden, giving a steady supply of small to medium sized sprouts with tight heads just in time for Christmas dinner.

This variety has received the RHS Award of Garden Merit and is tried and tested, sturdy and reliable.

(Average seed count in regular packet - 100)

CABBAGE

DERBY DAY (ORGANIC) (CbDD) **£2.90**

Brassica oleracea

This is our favourite summer cabbage. An excellent variety for cropping as early as June. It is more resistant to splitting and bolting than some other fast-growing varieties. It has a dense interior of mild flavour that is ideal for steaming, boiling or in used in a coleslaw. *(Average seed count in regular packet - 100)*

JEJU ISLAND NAPA (ORGANIC) (CbJj) **£2.60**

Brassica campestris var. pekinensis Makino

Originally from Jeju island, perfect for making kimchi or adding to stews and soups. The seeds of this line came from a farmer from Jeju Island, the volcanic island on the Southern part of Korea. This is a heritage Chinese cabbage variety, also called "Gueok" or "Gueokbeachu". The plants grow well in our climate, making compact, slightly elongated heads with a cream coloured heart reaching up to 2kg. The flavour is mild yet typical Chinese cabbage with a twist of Indian mustard. It's traditionally used to make kimchi as well as other Korean dishes such as Gochujang (cabbage soup) or Ssam (cabbage wrap). *(Average seed count in regular packet - 150)*

KALIBOS (ORGANIC) (CbKa) **£2.70**

Brassica oleracea

A heritage variety from Eastern Europe producing pink/purple pointed heads of roughly 2kg. This beautiful variety is a traditional rare variety from Eastern Europe. It is deliciously sweet and is perfectly suited to shredding into salads and fermenting into saurkraut. *(Average seed count in regular packet - 100)*

LANGEDIJK RED LATE (ORGANIC) (CbLr) **£2.60**

Brassica oleracea

This improved variety is particularly suited for storage and has good taste. It also makes a very fine sauerkraut, turning bright pink during the fermentation with the addition of salt. Red cabbage can be used as a litmus test for acidity turning blue in more alkaline conditions. *(Average seed count in regular packet - 100)*

VERZA MORETTA (ORGANIC) (CbVM) **£3.50**

Brassica oleracea

Fantastic traditional 'Veronese' purple Savoy cabbage with bright green centre. This striking variety has been cultivated in the countryside around the Adige river in Italy since the nineteenth century and is on the official list of traditional rare varieties.

It has purple and green outer leaves and bright green-yellow centres. Forms a compact head with a sweet flavour, perfectly suited to salads, soups, and risottos. *(Average seed count in regular packet - 50)*

CARROT

AUTUMN KING (ORGANIC) (CaAK) **£1.60 - 4.00**

Daucus carota

An award-winning maincrop variety, also ideal for storage over the winter months. How could we not include Autumn King in our catalogue?! This is one of our favourite varieties, and certainly lives up to its name. It is an RHS Award of Garden Merit winner and is a firm favourite amongst both home and market gardeners. It produces conical roots up to 30cm long and with a deep organgey-red colour. It is sweet-tasting and delicious both raw and cooked. *(Average seed count in regular packet - 400)*

New for 2027

FANTASIA (ORGANIC) (CaFa) **£2.50**

Daucus carota

(Average seed count in regular packet - 300)

LILA LU (ORGANIC) (CaLL) **£1.95**

Daucus carota

Lila Lu is a purple carrot on the outside contrasting with a vibrant orange interior, sweet and crunchy. This is a modern European breed specifically developed for organic growing conditions. It has a crunchy texture and pleasantly sweet taste, the purple pigmentation is attributed to a higher levels of the potent antioxidant 'anthocyanin' alongside the usual beta carotene that orange carrots offer. Carrots have been bred since the 10th centruary in Asia, whilst we have come to know carrots in their orange standard, their ancestors were yellow and purple, we appear to have come full circle with this 'new' variety. *(Average seed count in regular packet - 400)*

NANTES 2 (ORGANIC) (CaNa) **£1.60 - 3.80**

Daucus carota

Originally from France but grown in this country for decades as a kitchen garden favourite, this is a classic carrot variety of the half-long type. Reaching up to 17cm in length and 3-4 cm in diameter, it is a sweet, bright orange, blunt, cylindrical root, round at the top and bottom. It has fine texture and delicate flavour with almost no core. It is ideal for early sowings but can delight you with a tasty crop throughout the year as well. *(Average seed count in regular packet - 400)*

YELLOWSTONE (ORGANIC) (CaYe) **£1.80**

Daucus carota

Yellowstone carrots have a delicate, sweet flavour. They cook just as well as their orange siblings but add that extra rainbow colour to any plate of food. And of course delicious raw with lots of crunch. They produce large foliage which is reflected in the often large root that is growing beneath the ground. *(Average seed count in regular packet - 400)*

CAULIFLOWER

SNOWBALL (ORGANIC) (CFSn) **£2.30**

Brassica oleracea

Snowball cauliflower was bred in the 1890s in America, and it has certainly stood the test of time. It produces heads of up to 15cm diameter ready 65-70 days from sowing. It has a mild flavour perfect for cooking but also delicious raw.

The plants are smaller than some cauliflowers and so can be planted closer together. We particularly love this variety due to its flexibility. *(Average seed count in regular packet - 200)*

CELERIAC

IBIS (ORGANIC) (CIlb) **£2.30**

Apium graveolens

Ibis is a vigorous variety that produces smooth white skinned globes with a good dense interior. Its celery-like nutty mild taste enriches soups and stews and it tastes amazing when roasted or mashed. Our favourite recipes include celeriac schnitzel, battered and pan-fried and celeriac chips with curry powder.

We're selling particularly this variety because it has all the qualities you would want from a celeriac. Its smooth skin makes it easy to clean, it's resistant to septoria, good for storing and is bolt-hardy which makes it suitable for early cultivation under protection. *(Average seed count in regular packet - 300)*

CELERY

TALL UTAH (ORGANIC) (CeTU) **£1.60**

Apium graveolens

We love the deep green colour of this celery and its super-crunchy string-less stalks. It was first introduced in the USA in 1953 and was the outcome of a breeding program by the Ferry Morse Seed Company in California. It was developed to be resistant to many common diseases of celery, and remains a reliable variety to this day. *(Average seed count in regular packet - 200)*

CELTUCE

CELTUCE (ORGANIC) (LeCe) **£2.10**

Lactuca sativa

Also known as Chinese Lettuce both stem and leaves are edible. A delicious and versatile vegetable popular in Asian style recipes. The stem is crunchy with a nutty flavour. Treat Celtuce as you would a lettuce growing it either under cover or outside. Harvest stems at around 15-20 cm high and a diameter of 3-4 cm. Celtuce seed does not germinate in high temperatures so with summer sowing keep very well watered. *(Average seed count in regular packet - 300)*

CHARD

BULL'S BLOOD (ORGANIC) (BLBB) **£2.30**

Beta vulgaris

The leaves are exceptionally dark red, almost purple colour and very tender and sweet, especially as baby-leaf. They can be cut up to 4-5 times and will grow back. *(Average seed count in regular packet - 200)*

ERBETTE (ORGANIC) (BLPS) **£2.20**

Beta vulgaris

Perpetual spinach or beet leaf is actually a part of the chard family. It tastes similar to spinach but is slightly earthier in flavour.

Hardy, easy to grow and bolt-resistant in its first season it makes a good replacement for true spinach where growing conditions are difficult. *(Average seed count in regular packet - 200)*

FIVE COLOURS (ORGANIC) (BLFC) **£2.90 - 4.20**

Beta vulgaris

Harvested as baby leaf in less than 6 weeks. Both the tender leaves and stalks are easy to fry, steam, blanch or add to an omelette. This variety of chard is less hardy and doesn't handle frost as well, so best not relied on as your only winter green. *(Average seed count in regular packet - 130)*

PEPPERMINT (ORGANIC) (BLPM) **£2.30**

Beta vulgaris

A beautiful and very productive variety of two tone pink and white stems. This variety was given to us by our friends at Trill Farm Garden, who said it was the best chard they had ever grown (and they have grown a lot of chard). Very strong and healthy plants with great consistency. A real winner for the veg patch or market garden. *(Average seed count in regular packet - 100)*

RHUBARB (ORGANIC) (BLRh) **£2.30**

Beta vulgaris

This ornamental looking chard is worth just growing for its beauty! It can be used like any other chard or spinach. *(Average seed count in regular packet - 200)*

Chard continued...

WHITE (ORGANIC) (BLSw) **£2.30**

Beta vulgaris

If you need a leafy vegetable that 'just grows' Swiss Chard is a garden essential. From two sowings, one in the Spring and one in the Autumn, you can have chard almost all year round. In Fred's words "Chard is just always there, even if you don't want it, it's still there". *(Average seed count in regular packet - 200)*

CHICORY

CATALOGNA GIGANTE DI CHIOGGIA (ORGANIC) (ChCG) **£2.20**

Cichorium intybus

Leaf chicory best used as a delicious sautéing green. Catalogna Gigante di Chioggia - also known as dandelion greens - is an open leaf chicory type which is similar to wild chicory.

The leaves make some of the best sautéing greens around, sweet with a slight bitter edge. They can be blanched in salty water to remove some of the bitterness if desired. Drain and fry up with garlic and chilli for a truly delicious side dish. *(Average seed count in regular packet - 200)*

PAIN DE SUCRE (ORGANIC) (ChPS) **£1.60**

Cichorium intybus

This is a more mild tasting chicory that is a superb substitute for lettuce in the winter. Indeed, this is a common practice in several rural parts of France and no doubt elsewhere, too. It can produce very large heads, with a tender green exterior and golden yellow hearts that have a real sweetness to them, hence the name! *(Average seed count in regular packet - 500)*

PUNTARELLE (ORGANIC) (ChPt) **£2.50**

Cichorium intybus

An interesting chicory variety grown for its hollow bolting shoots. Unlike other chicory varieties which are grown for their leaves, Puntarelle is grown for its flowering shoots. The young shoots form a 'head' at the base of plant and are julienned into thin strips which are then soaked in cold water to removed some of their bitterness. In the water they twist and curl into elegant crisp and crunchy shapes which are then served with a punchy dressing to make a lovely late autumn salad.

Shoots usually appear between mid-October and November. *(Average seed count in regular packet - 100)*

RADICCHIO CASTELFRANCO (SM4.18) (ORGANIC) (ChCF) **£2.50**

Cichorium intybus

Stunning extra early radicchio best suited for raw salads. Castelfranco radicchio varieties are considered the queen of salad leaves. Their exquisite beauty will add something very special to your salad bowl, and their flavour is much sweeter than other radicchio types.

The plants begin with broad open green leaves, developing a central head as they mature. The inner leaves take on a pale yellow colour with beautiful burgundy speckles. *(Average seed count in regular packet - 100)*

Chicory continued...

RADICCHIO CHIOGGIA '506 TT' (ORGANIC) (ChT5) **£2.20 - 5.50**

Cichorium intybus

Fantastic modern Palla Rossa type radicchio forming large round heads. This is a wonderful new Radicchio variety much celebrated by market gardeners due to the high consistency of its heads which can be harvested from September until December.

The leaves can be eaten raw as a delicious addition to winter salads, or they can be sliced and baked with olive oil and balsamic. *(Average seed count in regular packet - 150)*

RADICCHIO ROSA 'JOLANDA' (ORGANIC) (ChRs) **£2.20**

Cichorium intybus

A beautiful and early salmon-pink radicchio variety forming loose heads from October. This one is a real show-stopper! A really unique radicchio making the most exquisitely pink leaves unlike no other leafy veg we have grown before.

'Jolanda' is an early selection of Rosa (which often tends to be a later-cropping type) so it's much better suited to the UK climate. *(Average seed count in regular packet - 100)*

RADICCHIO TREVISO EARLY (SM4.10) (ORGANIC) (ChTE) **£2.20 - 6.72**

Cichorium intybus

A mid-early Treviso-type radicchio ideal for both salads and cooking. Treviso is one of the main centres of radicchio production in Italy and "Precoce" means early. This variety produces dense elongated heads, of striking deep red and white appearance which can be harvested from autumn.

The leaves make a wonderful addition to raw salads as they are sweeter than some red headed radicchio types. The heads are equally tasty grilled or sautéed as is commonplace in Italy. *(Average seed count in regular packet - 100)*

RADICCHIO TREVISO LATE (FORCING) (ORGANIC) (ChTL) **£2.50**

Cichorium intybus

A forcing chicory from Treviso for delicious winter eating. This variety of chicory has been bred for forcing through the winter months (Tardivo means late in Italian), and produces totally delicious 'chicons'

To force chicory the plants should be left untouched in the field until winter time. When you wish to force them, pull up however many plants you need and replant the roots into a moist medium such as sand or spent compost. The plants then need to kept in total darkness for a few weeks and then beautiful chicons will grow from the roots. *(Average seed count in regular packet - 100)*

New for 2027

WILD GARDEN II (ORGANIC) (ChWG) **£2.20**

Cichorium intybus

A diverse mix of culinary chicory varieties. Another great breeding mix from the folks at Wild Garden Seeds. *(Average seed count in regular packet - 100)*

CIMA DI RAPA

CENTO--CINQUANTA (ORGANIC) (Cr150) **£2.10**

Brassica rapa

Slow growing variety, also known as rapini or broccoli rabe. This variety is ready to harvest within 150 days and can be grown all year round, although best sown April-May. It is slower to make heads and bolt than San Marzano, making it slightly easier to grow.

Prized as a delicacy in Italy for its sweet and slightly bitter taste, cima di rapa translates as 'turnip greens', the plants produce large serrated edible leaves much like a turnip and delicate flowering florets. The leaves, stems and florets can all be eaten. *(Average seed count in regular packet - 300)*

SAN MARZANO (ORGANIC) (CRMz) **£2.10 - 3.00**

Brassica rapa

A really easy to grow broccoli alternative producing tender flowering shoots around 60 days from sowing. Cima Di Rapa (also known as broccoli raab), is actually botanically a type of turnip rather than a broccoli. As such it is very quick to grow and unfussy in terms of its water and nutrient requirements. *(Average seed count in regular packet - 300)*

CLIMBING FRENCH BEANS

BLAUHILDE (ORGANIC) (BCBl) **£2.95**

Phaseolus vulgaris

We like to grow a variety of different colour beans as they are such a versatile crop. Blauhilde can be grown outside or indoors and makes an excellent market garden variety as it's productive, disease resistant and exquisite in taste. *(Average seed count in regular packet - 80)*

BORLOTTI DI FUOCO (ORGANIC) (BCBF) **£2.95**

Phaseolus vulgaris

Borlotti is one of the most beautiful climbing French bean varieties available. The pods have a stunning colour with dapples of bright pink and white. The bean itself is creamy white with maroon speckles.

We love them for their excellent taste, colour and versatility. Either eat the young pods raw or cooked, or the beans when matured. Just shell and use like a dry bean. *(Average seed count in regular packet - 60)*

COBRA (ORGANIC) (BCCo) **£3.10 - 5.80**

Phaseolus vulgaris

Cobra is an extremely popular and very reliable French bean variety and an RHS Award of Garden Merit winner. It's got everything you'll want from a bean. It produces an early crop of stringless round green pods that have the most delicious flavour.

The showy violet-purple flowers will stand out in your garden and you'll be surprised at how long your beans will keep coming. *(Average seed count in regular packet - 80)*

Climbing French Beans continued...

GOLDEN GATE (ORGANIC) (BCGG) **£2.95**

Phaseolus vulgaris

A heavy-cropping pole bean variety that we really enjoy for the buttery, smooth textured beans that will stay tender and stringless even as they get larger. A great addition to your other green and purple beans. *(Average seed count in regular packet - 75)*

PEA BEAN (ORGANIC) (BCPB) **£2.85**

Phaseolus vulgaris

Stringless flatish pods followed by plentiful fresh beans that turn maroon and cream once dried. This pretty heritage variety of bean has been passed through the weathered hands of generations of gardeners since the 16th century. It's the ultimate all-rounder providing plentiful flat smooth skinned green pods. As the pods fill out with beans and dry they develop a delightful maroon and cream pattern, great for long storage and comforting winter stews. An easy to grow climbing bean with great drought tolerance and plentiful abundance. *(Average seed count in regular packet - 60)*

COURGETTE

BLACK BEAUTY (ORGANIC) (SSBB) **£2.50 - 3.50**

Cucurbita pepo

A classic dark-green summer squash with creamy white flesh. Best picked young when no longer than 25cm. The plants have an open growth habit which makes it easy to pick the fruit and they won't stop coming! Try battering and frying the male courgette flowers for a gourmet addition to a summer meal. *(Average seed count in regular packet - 17)*

COCOZELLE (ORGANIC) (SSCo) **£2.95**

Cucurbita pepo

We have grown this traditional Italian variety of courgette for many years and it has become a staple part of our summer diets. It is a prolific producer of good looking and great tasting fruits. It has a bush-type growth habit making it suitable for smaller plots or even container growing. *(Average seed count in regular packet - 20)*

LEMON (ORGANIC) (SSLe) **£2.50**

Cucurbita pepo

A trailing summer squash variety producing an abundance of lemon-sized and shaped fruits. This is a very interesting variety of summer squash which sits somewhere between a patty pan and a courgette. Its flesh is slightly denser than a typical courgette and is extremely tasty. A definite star of the veg patch and will keep on producing until the last frosts. *(Average seed count in regular packet - 20)*

Courgette continued...

SOLARA (ORGANIC) (SSSo) **£2.95**

Cucurbita pepo

A bright yellow variety producing an abundance of fruits over a long period. Solara is a fantastic modern open-pollianted yellow fruited courgette. We are really impressed with how productive and uniform this variety is compared to other yellow varieties we have tried and they taste superb. A couple of plants will keep you well fed throughout the summer. *(Average seed count in regular packet - 20)*

TONDO DI NIZZA (ORGANIC) (SSTN) **£3.00**

Cucurbita pepo

If you're looking for something a little bit different in your courgette patch, Tondo di Nizza would be a good choice. It is an Italian heritage variety that provides you with an abundant crop of round courgettes. Best harvested when approximately 10cm in diameter, just before the skin darkens in colour. *(Average seed count in regular packet - 15)*

CUCAMELON

CUCAMELON (ORGANIC) (CuCa) **£1.80**

Melothria scabra

An unusual cucumber relative producing an abundance of grape-sized crunchy fruits. Cucamelons have become popular addition to the veg patch in recent years. Despite the name they are neither cucumber or melon but their own species, Melothria scarba.

They are best grown up a trellis system as they have a sprawling growth habit. Their fruits are crunchy, fresh and tangy, and make a great snack or pickle. *(Average seed count in regular packet - 20)*

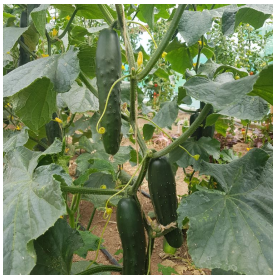

CUCUMBER

CRYSTAL LEMON (ORGANIC) (CuCL) **£2.25**

Cucumis sativus

First cultivated in 1894 in New Zealand, these small apple shaped cucumbers with pale skins are an unusual and very pleasing variety of cucumber. The plant is an attractive climber and will produce prolifically throughout the summer, whether planted in a container or in free draining soil. The skin gets tougher as the fruit ages so they are best picked early on. *(Average seed count in regular packet - 11)*

MARKETMORE (ORGANIC) (CuMa) **£2.00 - 4.00**

Cucumis sativus

As British reggae artist Macka B makes clear in his ode to 'Cocombers' (see youtube for reference) the humble cucumber has many a good reason to grow and eat it. The Marketmore variety produces luscious, cylindrical, dark green fruits and does so in abundance throughout the summer. It grows well in both poor and rich soil conditions and will ensure you are full of good electrolytes for the rest of the year. *(Average seed count in regular packet - 20)*

Cucumber continued...

SHINTOKIWA (ORGANIC) (CuSh) **£2.25**

Cucumis sativus

Exquisite cucumber prized for an outstanding sweet flavour, delicious juiciness and crisp, crunchy texture. This cucumber is amazing, it's our new favourite. Known for its vigorous growth and productivity, this variety makes dark green long and slender fruits. They are mostly straight (when trellised) and uniform with an occasional curve. *(Average seed count in regular packet - 11)*

DWARF FRENCH BEANS

BRITTANY HARICOT (ORGANIC) (BDHa) **£2.95**

Phaseolus vulgaris

Plump round bean with purple marbled pods best enjoyed half-dry . If this bean was grown in the Cotes d'Amor region of Brittany, it would be called Coco di Paimpol. With a creamy nutty flavour this Haricot bean is traditionally sold at French markets demi-sec in pods and enjoyed in hot and cold dishes. *(Average seed count in regular packet - 60)*

FARADAY (ORGANIC) (BDFa) **£2.71 - 4.00**

Phaseolus vulgaris

This is one of our favourite dwarf beans, it is a modern variety bred for disease resistance, and it does exactly what it says on the tin! It makes delicious beans, eaten raw or cooked. *(Average seed count in regular packet - 80)*

FENNEL

PERFEKTION (ORGANIC) (FePe) **£2.00 - 4.90**

Foeniculum vulgare

Perfektion creates a succulent, round, white bulb with fine flesh. It has a delicious anise flavour and is reliable in its growing pattern. This variety also has attractive fern-like foliage which is also edible and good for adding a hint of anise to your cooking. Suitable for early or late cultivation. *(Average seed count in regular packet - 130)*

GROUND CHERRY

COLUMBIA CHERRY (ORGANIC) (GCCC) **£2.10**

Physalis edulis

A cape gooseberry with cherry-shaped fruits. This is a delicious variety of physalis with a full and fruity flavour, with an excellent balance of sweet and sour. The fruits ripen from September until the first frosts, growing on plants that can be very tall and bushy. Large, superb variety developed in Germany. *(Average seed count in regular packet - 25)*

Ground Cherry continued...

COSSACK PINEAPPLE (ORGANIC) (GCCP) **£2.10**

Physalis pruinosa

Deliciously sweet half-inch diameter fruits on short bushy plants. Cossack Pineapple is a superb variety of ground cherry, very productive plants 12 inches high and 24 inches diameter.

The Pineapple-sweet fruits make a delicious and healthy snack and are especially loved by children. They are naturally high in pectin so are perfectly suited to making jams and preserves. *(Average seed count in regular packet - 25)*

KALE

BEAR NECESSITIES (ORGANIC) (KaBN) **£2.10 - 4.00**

Brassica napus

An unusual ultra-frilly Red-Russian type. Bear Necessities has leaves unlike any other kale as it was bred from a cross between a mizuna and a kale. It's ultra frilly leaves lend themselves to salads when young and are great cooked when larger.

The leaves have a high volume and surface area which means they stir-fry particularly well, easily getting coated in delicious flavours and holding their shape. *(Average seed count in regular packet - 200)*

DAZZLING BLUE (ORGANIC) (KaDB) **£2.85 - 4.00**

Brassica oleracea

This showy kale was bred by Hank Keogh from Avoca Farm in Oregon, USA. He back-crossed 'Lacinato rainbow' with the Wild Garden Seed 'Lacinato'. In looks it resembles a Cavolo Nero kale and it has stunning blue, green and pink colours. The leaves are savoyed and have underturned margins, the plant grows upright and is very cold-hardy - more so than any other Cavolo Nero type kales. Tender and tasty, great for sautéing, steaming or finely chopped in a salad. A solid vegetable for the home or market garden. *(Average seed count in regular packet - 200)*

DWARF GREEN (ORGANIC) (KaDG) **£2.10**

Brassica oleracea

A deep green leaf colour and frilled edges with a succulent delicate flavour make this variety an attractive kale to grow. It is extremely hardy and withstands frosts in the winter when no other brassica stays standing while also producing well when sown in spring for a summer harvest. It is a Scottish heritage kale dating back to the 19th century, originally known as 'Dwarf Curlies' or 'Scotch' kale. It grows to only 40cm high making it perfect for windswept sites or for growing in containers. *(Average seed count in regular packet - 180)*

NERO DI TOSCANA (ORGANIC) (KaCN) **£2.50 - 3.50**

Brassica oleracea

Surely this is the king of kales! We always grow masses of Nero di Toscana, we cant get enough of it. It has been a staple of Italian cuisine for centuries and heavily features in the iconic 'Ribollita' Tuscan bean stew.

Although usually steamed or stir-fried, kale leaves can also be massaged raw with a little olive oil, salt and lemon juice and made into a salad. Well worth a try if you haven't already! *(Average seed count in regular packet - 150)*

Kale continued...

PENTLAND BRIGG (ORGANIC) (KaPB) **£2.10**

Brassica oleracea

With parents such as these it's no wonder this is such a great variety.

In form it is very much in between it's parents, being slight less curled than Dwarf Green but more curled than Hungry Gap. It is extremely cold hardy and produces an abundance of sweet and delicious shoots in the spring which can be eaten like sprouting broccoli (known as kale raab) *(Average seed count in regular packet - 120)*

RED RUSSIAN (ORGANIC) (KaRu) **£2.10 - 4.40**

Brassica napus

A productive plant, it reaches 90cm in height and can be harvested throughout the winter becoming sweeter after a frost. The tender young leaves are great in salads and larger leaves are attractive as well as delicious. This kale is so tasty you can eat it on its own, but it's also a perfect addition to smoothies, salads and stir fries. You can get in the habit of adding it to most meals! In Scotland, kale used to be a mainstay of the traditional diet. So much so that to be "off one's kail" means to feel too ill to eat. *(Average seed count in regular packet - 200)*

TUSCAN RAINBOW (ORGANIC) (KaLR) **£2.30 - 4.80**

Brassica oleracea

A Frank Morten cross from Wild Garden Seed in Oregon, USA of Cavolo Nero 'Lacinato' and Redbor hybrid kale. The majority of the plants have savoyed, blue-green leaves with ruffled edges, others are more purple or more white, some have more ruffling and others less. When grown outdoors the colours will intensify with the cold. It is a hardy and very beautiful kale tasting. sweet and aromatic.

We planted 'Lacinato rainbow' in our 2018 trial and relished in this diverse variety that tastes amazing and is more funky and cold-resistant than the usual Cavolo Nero *(Average seed count in regular packet - 200)*

KALETTES

New for 2027

WHITE WINTER (ORGANIC) (KaWW) **£2.50**

Brassica oleracea

An open pollinated breeding population of flower sprouts, similar to Kalettes. *(Average seed count in regular packet - 200)*

KOHLRABI

PURPLE DELICACY (ORGANIC) (KRDe) **£2.20**

Brassica oleracea

Purple Delicacy is certainly our shining star for early and late season crops. It grows fast and consistently and is ready to harvest after 8-12 weeks. Although sometimes considered a root vegetable, kohlrabi is actually the swollen stem of the plant. The whole plant can be eaten, the large leaves can be cooked like kale and smaller leaves make a pretty and very tasty addition to salads. *(Average seed count in regular packet - 125)*

Kohlrabi continued...

SUPERSCHMELZ (ORGANIC) (KRSu) **£2.20**

Brassica oleracea

If left to grow it can reach up to 8kg. It is resistant to bolting and splitting.

Fred has been growing Superschmelz kohlrabi for years. "It gets huge, it stores really well AND it stays tasty and crunchy!" is his verdict.

We think kohlrabi is best eaten raw in salads or straight from the garden. It is also nice pickled or added to stews and stir fries. *(Average seed count in regular packet - 100)*

LEEK

BANDIT (ORGANIC) (LkBa) **£2.25 - 5.00**

Allium porrum

We have even adopted (and adapted) a Catalan festival - the calcotada - to celebrate the end of the leek harvest in mid-May where we barbecue the remainder of the crop and have a party! *(Average seed count in regular packet - 200)*

GIANT WINTER (ORGANIC) (LkGW) **£2.25**

Allium porrum

This is a leek of outstanding flavour which will sit even through the bleakest of winter weather, providing you with a delicious ingredient to add to your wholesome winter stews and soups. Eating large amounts of leeks is one of the things that makes the winter months bearable and we are always sad when they come to an end in spring. *(Average seed count in regular packet - 300)*

HANNIBAL (ORGANIC) (LKHA) **£2.25**

Allium porrum

An organic favourite, Hannibal produces a long dense shaft and mid-green leaves. It has a mild flavour and plenty of heart. *(Average seed count in regular packet - 300)*

PANDORA (ORGANIC) (LkPa) **£2.50**

Allium porrum

Pandora is a quick maturing summer leek that can be harvested from late summer onwards. It's delicious and uniform and makes long tender white stems and a dark blue-green foliage.

You shouldn't really be eating leeks in August, but if you sow Pandora in time you'll find that it is possible! *(Average seed count in regular packet - 300)*

LETTUCE

BRIGHTON (ORGANIC) (LeBr) **£1.98**

Lactuca sativa

Hardy and reliable lettuce variety producing large delicious heads making it ideal for winter and early spring use. It is one of the varieties we sow in September *(Average seed count in regular packet - 250)*

ELF EARS OAK (ORGANIC) (LeEE) **£2.00 - 3.90**

Lactuca sativa

Elf Ears Oak is a tasty and beautiful lettuce with slightly savoyed leaves that have an elongated tip and a dense compact heart. The leaves almost resemble a dandelion in terms of shape but the good taste, sweetness and crunch make it a superior salad ingredient. It was bred by Frank Morten from Wild Garden Seed in Oregon, USA. *(Average seed count in regular packet - 250)*

FINE SPECKLED OAK (ORGANIC) (LeFS) **£2.00**

Lactuca sativa

Fine Speckled Oak was one of Fred's favourites in our 2018 lettuce trials. It was super healthy and had very consistent growth throughout the population. At full maturity it forms a dense colourful heart. An attractive and vigourous lettuce bred by Wild Garden Seed in Oregon, USA, that we are very pleased to offer in our catalogue. *(Average seed count in regular packet - 250)*

FLASHY LIGHTNING BUTTER-OAK (ORGANIC) (LeFL) **£1.95 - 3.90**

Lactuca sativa

Exquisitely mild, juicy and sweet with a silky texture. This is a masterpiece of lettuce breeding from Wild Garden Seed in Oregon, USA. We are extremely happy to offer this variety in our catalogue as it combines all the goodness one can find in a lettuce. *(Average seed count in regular packet - 200)*

GRENOBLE RED (ORGANIC) (LeGR) **£1.98 - 4.00**

Lactuca sativa

Grenoble Red or Rouge Grenobloise is a Batavian heirloom lettuce with waffled leaves that are tinged with a maroon colour. It's tolerant to the cold and has an ability to grow for longer than most varieties when its outer leaves are repeatedly picked off. While it is an excellent winter variety, it can also be sown in the spring and summer too. *(Average seed count in regular packet - 200)*

Lettuce continued...

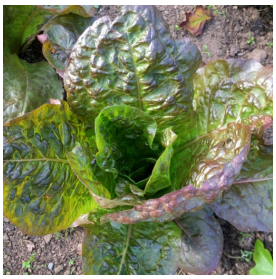

LITTLE GEM "MAUREEN" (ORGANIC) (LeMa) **£2.20 - 4.00**

Lactuca sativa

Maureen is a superb selection of Little Gem with resistance to Downy Mildew, tipburn and Bremia BL.

The plants are quick to mature and resistant to bolting. They form neat heads of a brilliant green colour with extremely sweet and flavoursome, crunchy leaves forming a tightly filled heart.

This is our first choice of lettuce, it's simply one of the best lettuces to grow whether you're growing it in a garden or a larger scale. *(Average seed count in regular packet - 225)*

LITTLE LEPRECHAUN (ORGANIC) (LeLL) **£1.98**

Lactuca sativa

Cos or romaine lettuces are probably one of the oldest types of cultivated lettuce, originating in the Mediterranean. Little Leprechaun is popular as a salad leaf crop forming a compact, upright, dense lettuce with crunchy and tasty leaves, slightly tangy and very delicious. It can be grown outdoors throughout the growing season and is an old-time favourite amongst growers, gardeners and us. *(Average seed count in regular packet - 300)*

MARVEL OF FOUR SEASONS (ORGANIC) (LeMF) **£1.98 - 3.00**

Lactuca sativa

Marvel of Four Seasons is one great heritage variety. It is as pretty as it is tasty, crisp in texture and vigorous in growth.

It is slow to bolt and tolerant of low temperatures making it suitable for an extended growing season. The solid green head is tinged with red, bronze and burgundy colours. In cooler spring and autumn weather its colours will intensify and make it even more beautiful. *(Average seed count in regular packet - 250)*

MOONRED (ORGANIC) (LeMo) **£1.95**

Lactuca sativa

A little gem type lettuce with deep red tops to the leaves graduating to a bright green at the base. Also known as Red Little Gem, this is a stunning variety producing small compact heads which are aesthetically beautiful, deliciously sweet and with the same crunchy freshness of standard little gem. *(Average seed count in regular packet - 250)*

OLGA (ORGANIC) (LeOl) **£2.10**

Lactuca sativa

A light green frilly edged lettuce with a glossy crisp leaf. They are very sweet, crisp and nutty with a hint of butter. Great performance in the cold and heat. *(Average seed count in regular packet - 300)*

OUTREDGEOUS (ORGANIC) (LeOR) **£1.80**

Lactuca sativa

In 2014 Outredgeous became the first lettuce ever to be grown in space on the International Space Station due to its reliability and because it is so easy to grow.

It's an upright cut salad that forms a loose romaine head at maturity. An outrage of red in your salad bowl makes this a firm favourite for gardeners and growers. *(Average seed count in regular packet - 175)*

Lettuce continued...

RED SALAD BOWL (ORGANIC) (LeSB) **£1.98 - 3.00**

Lactuca sativa

This lettuce is known for its excellent taste and resistance to bolt. It has a non-heading growth habit with sweet, succulent oakleaf type leaves. We love it for its tenderness and cheerfulness in salads. As the name suggests one lettuce is usually enough to fill a whole salad bowl. *(Average seed count in regular packet - 250)*

VALDOR (ORGANIC) (LeVa) **£1.98**

Lactuca sativa

A green winter-hardy butterhead lettuce with great taste and texture. We wanted to include Valdor amongst our lettuces because it is simply one of the best winter lettuces there is. It forms tight medium-sized heads with the classic look of a butterhead. Sown in September, it can be cultivated outside or undercover for continuous picking or left to mature for an early spring harvest. *(Average seed count in regular packet - 250)*

WILD GARDEN MIX (ORGANIC) (LeWG) **£2.00 - 4.00**

Lactuca sativa

This is a funky blend of all sorts of lettuces that have been bred and are being bred by our favourite seed company in the United States, Wild Garden Seed.

"Instant lettuce diversity for cut salad or fresh market racks" is how they describe it on their website. "This is by far the most popular mix. *(Average seed count in regular packet - 200)*

LUFFA

LUFFA (ORGANIC) (Lufa) **£2.65**

Luffa aegyptiaca

A quick growing plant from the cucurbit family orginally from India producing 30 to 40 centimetres long fruits. Whilst the young fruits are actually edible, the mature ones can be boiled or dried to remove the flesh, revealing the sponge like fibres.

Germination can be tricky, needs hot temperatures constantly between 24 and 30°C and a long season to make a sponge. *(Average seed count in regular packet - 15)*

ONION

RED BARON (ORGANIC) (OnRB) **£2.25**

Allium cepa

Red Baron is a classic red onion producing large globe-shaped bulbs with a punchy flavour. They can be grown as a main-crop onion but are also suitable for bunching when picked young. *(Average seed count in regular packet - 350)*

Onion continued...

ROBELJA (ORGANIC) (OnRo) **£2.30**

Allium cepa

It makes beautiful dark red globe-shaped bulbs with a fine flavour. They store quite well for red onions but not as long as some white onions. *(Average seed count in regular packet - 350)*

STUTTGARTER (ORGANIC) (OnSg) **£2.30 - 3.60**

Allium cepa

We are excited to be selling this onion originating in the South West of Germany where Ronja is from. This onion also named "Stuttgarter Giants" is of fine flavour and stores well into spring provided that they are kept cool and dry. We recommend growing them in clusters and thinning them out when the plants are spring onion size to be enjoyed as such. *(Average seed count in regular packet - 350)*

TROPEA LUNGA (ORGANIC) (OnCT) **£2.50**

Allium cepa

Extremely sweet pointed red onion sought after by chefs around the world. This is probably Italy's most famous onion. It comes from the Tropea region which has the perfect climate for onion growing.

The pointed pink bulbs have a very high sugar content making them perfect for caramelising. Indeed some say they are so sweet you can eat them like apples! Each to their own, but you get the point... *(Average seed count in regular packet - 350)*

ZEBRUNE (ORGANIC) (OnZb) **£2.30 - 5.60**

Allium cepa

With their elongated bulbs and their creamy brown colour tinged with a deep pink, this shallot looks as elegant as it tastes. It has an ivory white coloured flesh that is crisp and tightly layered.

Zebrune is classed as a 'banana shallot' which is essentially a cross between an onion and a shallot. It inherited the best qualities from both sides. *(Average seed count in regular packet - 350)*

PARSNIP

TENDER AND TRUE (ORGANIC) (PaTT) **£1.90**

Pastinaca sativa

A classic French variety with very tasty long white roots. Tender and true is one of the best tasting parsnips you will find. If left in the ground until after the first frosts, the starch will turn into sugars and make this parsnip even sweeter.

The shoots and leaves of parsnip must be handled with care, as its sap contains furanocoumarins, chemicals that can cause burns on the skin when exposed to sunlight. *(Average seed count in regular packet - 500)*

PEAS

AMBASSADOR (ORGANIC) (PeAm) **£2.25**

Pisum sativum

Big juicy peas in a pod. What could possibly be more exciting than growing your own peas to go with a traditional dinner. Ambassador is robust, vigorous, productive and delicious. It won the Royal Horticultural Society's Award of Garden Merit in 1993 which was reconfirmed in 2005 and is one of the most widely used peas of its kind. *(Average seed count in regular packet - 80)*

BLAUWSCHOKKER (ORGANIC) (PeBS) **£2.45**

Pisum sativum

A stunning heritage pea variety with dark purple pods and bright green peas inside. This ornamental pea is an old European heritage variety. It has attractive pink flowers followed by lots of dark purple pods that contain tender, sweet, green peas. The delicious peas can be eaten fresh green and podded or allowed to mature for shelling and drying. Being mostly culitvated in North Germany and Holland, it is a robust and very productive variety. Traditionally this pea is eaten as a dry pea in a soup or stew but it's also very tasty and tender when eaten fresh. *(Average seed count in regular packet - 80)*

GOLDEN SWEET (ORGANIC) (PeGS) **£2.35**

Pisum sativum

Golden Sweet makes an unusual attraction in the pea patch. We love the extraordinary colour changes of the flower from cream to purple and blue when they mature. When the pods are still young they're very sweet and crunchy, as the pods get bigger they'll become more stringy which makes them better for cooking rather than eating raw. *(Average seed count in regular packet - 60)*

HERAUT (ORGANIC) (PeHe) **£2.35**

Pisum sativum

Heraut are delicious raw, when picked young and still flat, steamed or stir-fried, fantastic in salads and you can eat them 'pod and all'. They produce an early crop of sugar snap peas on productive and hardy plants. If picked regularly, more growth is encouraged.

This variety is quick to be ready to harvest and has a great taste, too. So much so that we couldn't resist snacking on it while growing it. *(Average seed count in regular packet - 60)*

PURPLE MAGNOLIA (ORGANIC) (PePM) **£2.45**

Pisum sativum

A vigourous, productive variety producing beautiful purple pea pods . Purple Magnolia is a stunning sugar snap variety that produces tall vines and abundant tasty pods, adding a striking contrast to your garden and plates.The pods retain their colour when eaten raw and are deliciously crunchy and sweet, perfect for snacking on while in the garden. *(Average seed count in regular packet - 60)*

Peas continued...

SOHARA (ORGANIC) (PeSo) **£2.45**

Pisum sativa

Purple flowering sugar pea with thick-walled edible pods of excellent flavour. A new variety bred and grown at Stormy Hall in North Yorkshire using the Biodynamic growing method. Grows 160-180 cm tall. Sohara is peforming well in dry as well in wet years. Pods stay sweet and edible for a extended time on the plant. It also can be sown in a green house or tunnel from November for an early crop. One of our favourites to munch on during field inspections. *(Average seed count in regular packet - 60)*

PEPPERS HOT

ADAM'S SWEET AND HOT (ORGANIC) (PHSH) **£1.95**

Capsicum anuum

Remarkable chilli/pepper variety of sweet flavour with a fruity heat. Discovered by Adam Alexander in a market in Donetsk, Ukraine in 1989, it's been grown in South Wales ever since with plants selected for earliness and flavour. The fruits are slightly ribbed, flattened and about the size of an apple. They are firm favourites across the team and when eaten fresh are exceptionally sweet, crunchy and full of flavour. Their subtle heat towards the top does define them as a chilli, although we see them more as a pepper. Plants are short, stocky and very productive. They can be grown outdoors in a sunny spot or under cover. *(Average seed count in regular packet - 20)*

ALEPPO (ORGANIC) (PHAl) **£1.95**

Capsicum annum

A Syrian variety that produces dark red chillies ideal for drying and crushing into a powder. Named after the Syrian city for its place on the Silk Road, the ripe fruits have a sweet, fruity, cumin-like flavour with a moderate heat. The plants are quite squat and robust and are easy to grow, making them an excellent choice for both novice and experienced chilli enthusiasts. SHU of around 10,000 on the Scoville Scale. *(Average seed count in regular packet - 15)*

BASQUE (ORGANIC) (PHBq) **£1.95**

Capsicum annum

A superb early chilli with mild heat which is a cornerstone ingredient in Basque cuisine. The plants are tall and produce an abundance of large conical, deep red fruits about 15 cm long and 3cm wide at the top.

When eaten raw they can be quite hot but once cooked they are very mild. The traditional use of these peppers in Basque is dried and powdered, but we have just eaten them like other chillies and totally love them. *(Average seed count in regular packet - 25)*

CRIOLLA SELLA (ORGANIC) (PHCS) **£1.95**

Capsicum annum

A Bolivian variety suited to cooler climates producing abundant yellow chillies with a citrus punch. Criolla Sella is a prolific producer, rewarding growers with an abundance of colourful, elongated pods throughout a long growing season. With a delicious flavour and moderate heat the chillies are perfect for salsas or sauces but can also be dried and ground into a flavourful powder. The plants are robust and easy to grow, making them an excellent choice for both novice and experienced chilli enthusiasts. SHU of around 25,000 to 30,000 on the Scoville Scale. *(Average seed count in regular packet - 20)*

Peppers Hot continued...

DE CAYENNE (ORGANIC) (PHCy) **£1.98**

Capsicum annum

Cayenne peppers are one of the best known chillis and rightly so. The abundance of hot, thin long fruits with great flavour and a thin skin make them perfect for making fresh hot sauce, pickling or dried and ground up into your own chilli powder.

The plant itself is super productive, upright growing and reaches about 60cm in height. SHU of around 30,000 to 50,000 on the Scoville Scale. *(Average seed count in regular packet - 20)*

New for 2027

HABANERO ORANGE (ORGANIC) (PHHO) **£1.95**

Capsicum chinense

Bright orange, very hot and fruity, a variety that is productive and does better in cooler climates than most other chillies *(Average seed count in regular packet - 20)*

HUNGARIAN HOT WAX (ORGANIC) (PHHW) **£1.95**

Capsicum annum

One of the best chillies for growing in the British climate. Long and pointed fruits, starting green and ripening to red. This is a reliable, quick growing and heavy cropper producing early fruits that continue to appear throughout the season. It's a a really excellent variety, bearing long pointy peppers in attractive shades of green, yellow, orange and red. *(Average seed count in regular packet - 22)*

JALAPENO, EARLY (ORGANIC) (PHJE) **£1.98 - 4.00**

Capsicum annum

Plants grow to 60cm high and fruit heavily, with harvesting of typical green Jalapeños beginning in early August, and continuing through into autumn. We thinly slice and preserve ours eating them with Mexican dishes throughout the rest of the year. *(Average seed count in regular packet - 20)*

LEMON DROP (ORGANIC) (PHLD) **£1.95**

Capsicum annum

One of our most popular chilli varieties with a bushy growth habit and lots of fruits ripening from green to yellow.

The variety is also called Aji Limon and originates from Peru where it's used as a seasoning pepper. Rating 30,000-50,000 SHU (Scoville heat units) it is quite a spicy one ideal for making your own hot chilli sauce with an extra citrusy twist or add it to stir fries, tomato sauces or your scrambled eggs. *(Average seed count in regular packet - 23)*

PADRON (ORGANIC) (PHPd) **£2.10 - 4.00**

Capsicum annum

A classic Spanish tapas variety, mild when picked young, very hot if left to mature. Padron is a stand-out favourite pepper variety for us. Traditionally the fruits are picked when small and green before they have developed much heat. If left on the plant a bit longer they will get very hot, and sometimes one slips through the net, hence the Russian roulette associated with this variety. As the fruits do not need to ripen you can start picking them early in the season so Padron is a good choice for the UK climate where some peppers struggle to ripen in our short and cool growing season. *(Average seed count in regular packet - 20)*

Peppers Hot continued...

RING OF FIRE (ORGANIC) (PHRF) **£1.98**

Capsicum annum

This is one of our staple chilli varieties to grow. It is very reliable and does exactly what it says on the tin - for better or worse!

The plants are compact growing to 45cm, and produce an abundance of fruit 1cm wide and 6-7cm long. This variety measures 70-85,000 SHU on the Scoville Scale, which classes it in the hot but not unbearable heat range. *(Average seed count in regular packet - 20)*

PEPPERS SWEET

New for 2027

COLLAGE (ORGANIC) (PSCol) **£2.20**

Capsicum annum

Exceptionally pretty snack pepper with variegated foliage and fruits ripening through the colours of the rainbow. A real head-turner of a pepper, with wonderful variegated leaves and fruits that change colour as they ripen, from green to purple to a glowing orange with streaks of deep red. The compact, stocky plants look almost like ornamental peppers, but the fruits are as delicious as they are good-looking: sweet, crunchy and surprisingly moreish. Great for pots and small spaces, it's one of those varieties that will have you admiring the plant almost as much as eating the peppers. *(Average seed count in regular packet - 10)*

CORNO DI TORO (ORGANIC) (PSCT) **£2.45**

Capsicum annum

The fruits have a long, pointed shape (hence the name "Bull's horn" in Italy). They can be picked when green and will turn red when fully ripe. With a deliciously sweet flavour and a crisp texture, it's ideal as a snack pepper or to cook with. Best to be enjoyed on the barbecue! *(Average seed count in regular packet - 15)*

PEPPERONCINI (ORGANIC) (PSPc) **£1.95**

Capsicum annum

Small sweet pepper variety from Tuscany traditionally used for pickling. An Italian pepper with the occasional hint of spice. Pepperoncini are often pickled in vinegar, made into delicious antipasti or cooked whole, served with classic Italian foods like pizza or pasta dishes. *(Average seed count in regular packet - 20)*

YOLO WONDER (ORGANIC) (PSYW) **£2.35**

Capsicum annum

Plants produce large green fruits which mature to red when fully ripe. A productive plant with a spread of about 60cm which is very suitable for British summers. I pick these green to encourage more fruiting and because the taste is just excellent, raw or cooked. - *Guest description by our friend Dan from Chagfood CSA!*
(Average seed count in regular packet - 15)

RADISH

BLACK SPANISH (ORGANIC) (RaBS) **£2.30**

Raphanus sativus

This radish is an old variety that is easy to grow and makes an excellent winter vegetable. It is larger than the standard radish with a spicy taste and crisp texture. It's great eaten raw in salads or cooked in a stew, stir-fry or used like a turnip. It's a reliable and robust radish that will keep throughout the winter outside or in storage, staying tender and without getting woody.

Sow thickly in July or August and thing out for small early harvests. *(Average seed count in regular packet - 250)*

CHERRY BELLE (ORGANIC) (RaCB) **£2.25 - 3.50**

Raphanus sativus

We love the way radishes signal that summer is well on the way! These cherry-like beauties are so fresh and crunchy and such a welcome addition to the lunch plate after the hungry gap. This variety was awarded an RHS Award of Garden Merit, making it an excellent choice for home gardeners. *(Average seed count in regular packet - 300)*

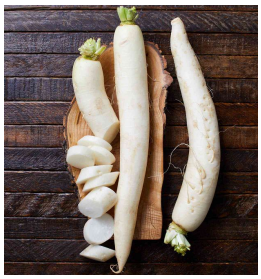

FRENCH BREAKFAST 2 (ORGANIC) (RaFB) **£2.05**

Raphanus sativus

If you were to eat a radish for breakfast, this would be the one. Cute in looks, sweet and mildly pungent in taste and with a succulent crunch, it makes a tasty healthy snack. Introduced in 1879 it became a seller on the Parisian markets and quickly spread around the world.

Growing it is pure pleasure because they are quick to mature and you can harvest them throughout summer. Best eaten simply, just sliced with some salt on it or mixed in with salad. *(Average seed count in regular packet - 300)*

RADISH. DAIKON

MINOWASE (ORGANIC) (RaMi) **£2.20**

Raphanus sativus

This is a great variety of Daikon radish for sowing after July. Its roots can grow huge - up to 3 inches in diameter! It is not too hot and stays very sweet and crunchy. It's best left in the ground until needed. We have some disagreement on the best way to eat Minowase; Fred likes to eat it raw and Ronja prefers to eat it cooked. Try both and see what works best for you! *(Average seed count in regular packet - 150)*

RUNNER BEANS

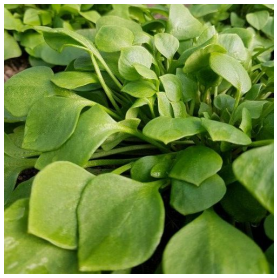

EMERGO (ORGANIC) (BREg) **£2.85**

Phaseolus coccineus

Emergo is a great variety which produces well even in our unpredictable UK climate. As well as being delicious and easy to grow its white flowers make a beautiful addition to the vegetable patch, especially when grown alongside a red-flowered variety such as Scarlet Emperor. *(Average seed count in regular packet - 30)*

SALAD LEAVES

CLAYTONIA 'WINTER PURSLANE' (ORGANIC) (MSWP) **£1.85**

Claytonia sibirica

Winter purslane, also known as miners lettuce or claytonia, has heart-shaped elegant looking leaves which are small, abundant and make a great cut-and-come-again salad green. You will get a productive harvest all winter and early spring and if left to self seed, it will just keep coming back year after year.

It is one of those greens that come up in just the right moment when we're most in need of something fresh and it self-manages very well which is why we like it too. *(Average seed count in regular packet - 850)*

CORN SALAD (ORGANIC) (MSCS) **£1.90 - 3.20**

Valerianella locusta

Corn salad or lamb's lettuce is a small annual plant that forms rosettes of dark green leaves which have a gentle nutty flavour, soft texture, and are extremely popular as salad greens. It provides a valuable source of fresh greens during the autumn and winter months as it is suitable for growing outdoors with little protection or under cover in the cold. *(Average seed count in regular packet - 600)*

NEW ZEALAND SPINACH (ORGANIC) (MSNZ) **£1.95**

Tetragonia tetragonoides

Hardy and succulent vegetable that is similar to spinach in taste and texture and can be used in cooking and salads. It is frost-tender but ready for harvest when true spinach will have long gone.

It's relatively easy to grow and very ornamental with its triangular shaped leaves and a trailing growth habit. *(Average seed count in regular packet - 60)*

RED ORACH (ORGANIC) (MSOr) **£2.05**

Atriplex hortensis

Red Orach is also called mountain spinach or French spinach and belongs to the Amaranth family. It is an ancient vegetable that has been cultivated for its leaves for hundreds of years. The leaves are arrowhead-shaped at the base and narrower at the top. They are of an intensely red colour and make a great colourful addition to salads as young leaves. Orach can also be used as an alternative to Spinach as it is easier to grow and less likely to bolt in warm weather. *(Average seed count in regular packet - 200)*

SALAD ROCKET (ORGANIC) (MSSR) **£1.80 - 3.50**

Eruca sativa

The nutritious dark green serrated leaves add their fine spice to salads, pasta, pizza, pesto, other sauces or as garnish. Salad rocket is native to the Mediterranean and has a long history of popularity. It is quick to crop and easy to grow and definitely one of our favourite salad leaves. *(Average seed count in regular packet - 900)*

Salad leaves continued...

SUMMER PURSLANE (ORGANIC) (MSPL) **£1.65**

Portulaca oleracea

This is a great salad vegetable undergoing a revival in popularity. It has crisp, fleshy leaves and a refreshing mild and sweet flavour.

This inconspicuous plant is often thought of as a weed but should actually be considered a superfood providing a good source of iron and vitamin A, B, C, and E. It is one of the best plant sources of Omega 3 fatty acids. *(Average seed count in regular packet - 1100)*

WASABI (ORGANIC) (MSWb) **£1.80**

Eruca sativa

Quick and easy to grow leaf giving the distinctive hot and fiery Wasabi root flavour to your salad. This quick growing salad leaf provides a unique punch. It is hot and fiery and more vigorous than traditional rocket varieties. Best sown in spring and autumn as it is prone to bolt in summer heat. Harvest leaves a few at a time or cut across the entire plant for up to 3/4 harvests. *(Average seed count in regular packet - 500)*

WILD ROCKET (ORGANIC) (MSWR) **£1.80**

Diplotaxis tenuifolia

Delicious and spicy serrated leaves, smaller and more delicate than their cultivated cousin. We love wild rocket as it just keeps on giving, even once it is going to seed it continues to produce new leaf growth if you cut it back. *(Average seed count in regular packet - 500)*

SOYBEAN

FISKEBY (ORGANIC) (BYFy) **£2.90**

Glycene max

An early-maturing edamame soybean perfect for UK gardens. Friskeby produces abundant clusters of plump, sweet pods ideal for steaming or drying. This variety has been bred to thrive in cooler climates and is the ideal gourmet addition to any vegetable patch. *(Average seed count in regular packet - 30)*

SPINACH

New for 2027

FLOCK (ORGANIC) (SpFk) **£2.80**

Spinacia oleracea

A breeding population of spinach created using four of our favourite varieties - sow it and see what you get!. We crossed Giant Winter, Matador, Abundant Bloomsdale and Merlo Nero to create this genetically diverse variety (sometimes known as a flock). It's currently in the F1 generation which means the first generation after the original cross was made. If you save seeds from these plants they will be the F2, and then next time F3 etc. Give it a go and breed your own spinach variety adapted to your local conditions. *(Average seed count in regular packet - 300)*

Spinach continued...

GIANT WINTER (ORGANIC) (SpGW) **£2.30 - 3.50**

Spinacia oleracea

This productive spinach is particularly recommended for autumn and winter cultivation. The dark green characteristically pointy leaves are very aromatic and perfect eaten raw in salads, or delicious cooked. *(Average seed count in regular packet - 500)*

MATADOR (ORGANIC) (SpMa) **£2.30**

Spinacia oleracea

Matador is 'the' tried and tested variety for your garden with large and tender leaves, bolt- and frost-hardy. It was Ronja's first spinach trial in her mum's raised beds that was a huge success. In spring when the spinach bolts and produces seed, you can easily save it and sow it again for your next crop. *(Average seed count in regular packet - 460)*

SPRING ONION

EVERGREEN (ORGANIC) (OnEv) **£2.25**

Allium fistulosum

An excellent hardy spring onion variety that produce bunching onions from autumn and that stand through winter. Evergreen are a non-bulbing spring onion and have a mildly, sweet flavour, ideal for salads and stir fries. They are best sown from March - September, with August and September sowings being ready for harvest in spring. *(Average seed count in regular packet - 300)*

WHITE LISBON (ORGANIC) (OnWl) **£2.10 - 3.95**

Allium cepa

This is traditionally the most popular variety of spring onion, and an essential addition to the veg patch. Quick, hardy and easy to grow. Its speed of growth makes it ideal for catch-cropping and year-round cultivation, with its small size meaning it can be easily squeezed into unused corners of the garden.

Spring onions are an extremely versatile culinary ingredient. Delicious both cooked and raw, they are a staple of our diet! *(Average seed count in regular packet - 300)*

SWEDE

New for 2027

DEVON CHAMPION (ORGANIC) (SdDC) **£1.75**

Brassica napus

A traditional variety of swede from Devon renowned for its excellent eating qualities. We are super-excited to be able to offer this traditional variety of swede which had been assumed to have gone extinct after being dropped from all the seed catalogues many years ago. *(Average seed count in regular packet - 275)*

Swede continued...

WILLHELMSBURGER (ORGANIC) (SdWi) **£1.60**

Brassica napus

Swede is a very valuable winter vegetable and easy to grow.

Wilhelmsburger is a German variety from 1935 bred for culinary use. Ronja's favourite recipe for swede is a bake with a creamy sauce and goats cheese. It will also make a great addition in stews or just roasted. *(Average seed count in regular packet - 275)*

SWEETCORN

GOLDEN BANTAM (ORGANIC) (SCGB) **£1.90 - 4.00**

Zea mays

A tall vigorous plant making 18cm long cobs full of medium sweet, rich, delicious kernels when harvested 'milk-ripe'. Best eaten or processed on the day of harvest for full flavour and before the sugars turn into starch. *(Average seed count in regular packet - 50)*

TOMATILLO

PURPLE MOUNTAIN LANDRACE (ORGANIC) (TIPM) **£2.30**

Physalis ixocarpa

Purple blushed landrace tomatillo productive and easy to grow as transplants. The big cherry tomato sized fruits are enclosed by a papery husk and are of astonishing flavours. It's the combination of tomatoey and lime flavours that make them ideal for salsas and other Mexican and Southamerican dishes. The fruits turn purple in patches on the plant and become more coloured when the fruit is exposed to sunlight after harvesting. *(Average seed count in regular packet - 20)*

TOMATO

BERNER ROSE (ORGANIC) (ToBs) **£2.45**

solanum lycopersicum

Heritage variety from Switzerland with pink coloured fruits of aromatic flavour. A indeterminate tomato that produces round medium-sized beefsteak tomatoes of a light red/ pink colour. Fleshy, thin skinned and with the most exquisite tomato flavours this tomato is a firm favourite amongst gardeners and growers. This traditional Swiss variety is rather late ripening but very worth waiting for. Best grown under cover. *(Average seed count in regular packet - 22)*

BLACK CHERRY (ORGANIC) (ToBC) **£2.30**

Solanum lycopersicum

They have a superb flavour, not too sweet, not too acid and are very juicy in texture. They have an amazing colour which is the result of a natural mutation discovered by the legendary tomato breeder Vincent Sapp of Tomato Growers Supply in 2003. *(Average seed count in regular packet - 25)*

Tomato continued...

BRAD'S ATOMIC GRAPE (ORGANIC) (ToBAG) **£2.45**

Solanum lycopersicum

What a tomato! It has crazy colours ranging from green, purple, black to orange and red. They are of a large grape to plum size, slightly elongated with a pointy tip. The fruits hold quite well on the vine and after harvesting without splitting. It is one of the best tasting tomatoes that we grew in 2020. Just make sure they are ripe when you harvest them, indicated by a colour change towards orange or red and a softness to touch. *(Average seed count in regular packet - 15)*

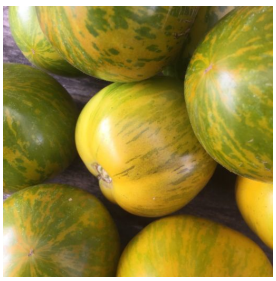

GARDENERS DELIGHT (ORGANIC) (ToGD) **£2.30**

Solanum lycopersicum

Gardener's Delight lives up to its name and has been a firm favourite amongst gardeners for years. Rightly it is an RHS Award of Garden Merit winner and also recommended by the National Institute of Agricultural Botany. Long full trusses of small fruits, sugar-sweet flavour and luscious juiciness.

We love this variety and can't recommend it enough. *(Average seed count in regular packet - 25)*

GREEN ZEBRA (ORGANIC) (ToGZ) **£2.45**

Solanum lycopersicum

In terms of appearance, this does what it says on the tin, but it does it very well. Fruits grow to around 8cm diameter and plants typically produce 6 to 8 fruits per truss. Quite fleshy, with very good taste and looks wonderful with other red and yellow tomatoes on a plate or at market.

Guest description by our friend Dan from Chagfood CSA! (Average seed count in regular packet - 25)

MANGO LASSI (ORGANIC) (ToML) **£2.20**

Solanum lycopersicum

(Average seed count in regular packet - 20)

MARMANDE (ORGANIC) (ToMm) **£2.30 - 4.20**

Solanum lycopersicum

Marmande is a fantastic variety producing fruits between 60g and 120g on semi-determinate vines which need support and pinching out. The fruits are very tasty raw or grilled on the barbecue. *(Average seed count in regular packet - 20)*

MATINA (ORGANIC) (ToMt) **£2.30 - 4.20**

Solanum lycopersicum

Matina is a potato leaf variety which crops well both under cover and outdoors. The fruits are golf-ball sized (40-45g) and ripen early in the season. The flavour is a delicious combo of sweet and acid. A firm favourite in the veg patch. *(Average seed count in regular packet - 20)*

Tomato continued...

PAUL ROBESON (ORGANIC) (ToPR) **£2.83**

Solanum lycopersicum

Paul Robeson is a cult classic. Seed savers and tomato lovers are raving about this variety.

The fruits are large and beautiful with a dusky red colour and green shoulders, their flesh is firm and juicy. It's most famous for it's distinctive smoky sweet and tangy flavour. *(Average seed count in regular packet - 20)*

PINK TIGER (ORGANIC) (ToPT) **£2.65**

Solanum lycopersicum

Pink Tiger is the most beautiful elongated plum cherry tomato you can imagine. The fruits are about 5cm long and striped with red and gold and have an excellent sweet flavour making them ideal in colourful salads.

This strain of seeds has been bred specifically to resist cracking and their flesh will stay firm for a very long time. *(Average seed count in regular packet - 25)*

RUTHJE (ORGANIC) (ToRu) **£2.45**

Solanum lycopersicum

This variety was bred 1996 in Germany by Ulrike Behrendt. Flavour and resistance to fungal disease was the main focus of the selection. It can deal well with a low intake of nutrients which promotes good taste. The firm fruits should be left on the plant until fully coloured and will keep for a long time on the plant. They can be stored and will also after-ripen. The plant has strong dark green almost shiny leaves, and short internodal length. *(Average seed count in regular packet - 25)*

SANTIAM SUNRISE (ORGANIC) (ToSS) **£2.65**

Solanum lycopersicum

Santiam Sunrise is without a doubt one of the tastiest tomatoes we have ever encountered. It is Fred's all time favourite for flavour. The fruits are 2-3cm across, growing on strong, stocky indeterminate vines.

Originally bred by the great Adaptive Seeds in the US as an open-pollinated alternative to the famous Sungold F1. The flavour is intensely fruity with a delicious zinginess. We recommend growing it under cover for best results. A real winner. *(Average seed count in regular packet - 25)*

SUNFIRED FLARE (ORGANIC) (ToSF) **£2.40**

Solanum lycopersicum

Medium sized beefsteak tomato with dark, almost black colours streaking down into orange and red. This productive indeterminate tomato variety was bred by fellow seed enthusiasts at Wild Mountain Seed in the US. The anthocyanins causing dark purple to black shoulders that stripe down into red and orange make them a real head turner. *(Average seed count in regular packet - 20)*

YELLOW SUBMARINE (ORGANIC) (ToYS) **£2.45**

Solanum lycopersicum

The fresh, sweet taste with juicy pulp and low acidity levels make this a popular tomato variety that will always look good amongst other tomatoes. The plant is a potato leaf type with an open growth habit. This is one of our most productive varieties, it just keeps on giving.

Great in salads and despite the unusual colour it makes a very delicious tomato sauce. However we end up eating most of them straight off the plant as they are so tasty! *(Average seed count in regular packet - 20)*

TURNIP

GOLDANA (ORGANIC) (TuGo) **£1.65**

Brassica rapa

Turnips are very traditional vegetables which, unlike most of the vegetables we eat, are native to Europe. For some reason they are not as popular as they used to be.

Goldana is a tasty maincrop variety with a uniform golden round shape, probably one of the mildest and sweetest varieties that you can find. It is quick to grow and doesn't need much attention. "Get them in, get them out" is what Fred says. He likes them in soups or stews but they can also be roasted, mashed or grated into a slaw or salad. *(Average seed count in regular packet - 400)*

PURPLE TOP MILAN (ORGANIC) (TuPT) **£1.60 - 3.00**

Brassica rapa

A classic Italian heritage variety from Milan with a creamy white, firm, crunchy and mildly sweet flesh. Eaten pickled, cooked or raw - it is a very versatile vegetable! The leaves are tasty and nutritious and can be cooked just like other greens. *(Average seed count in regular packet - 280)*

WINTER SQUASH

BLACK FUTSU (ORGANIC) (SWBF) **£2.85**

Cucurbita moschata

The mature fruits can weigh between 1 - 3kg and are deeply ribbed with flattened tops, turning an orange colour in storage. They store well but given the exceptional flavour you will get through them quickly! The deep amber-coloured flesh tastes creamy and nutty. Best roasted with salt, pepper and oil. *(Average seed count in regular packet - 12)*

DELICATA ZEPPELIN (ORGANIC) (SWDe) **£2.50**

Cucurbita pepo

Zeppelin-shaped fruits, yellow with green stripes. Incredibly sweet when roasted. Delicata squashes are famous for their sweet flavour when roasted. This superb selection (known as Zeppelin) has been improved by Frank Morton and his crew of plant wizards at Wild Garden Seed in the USA, and is a total winner.

Delicata squashes do not store well so are best eaten before Christmas. *(Average seed count in regular packet - 10)*

DESERT SPIRIT LANDRACE (ORGANIC) (SWDS) **£2.85**

Cucurbita maxima

Beautifully diverse new landrace with amazing flavours, textures and colours. Bred and created by the folks at Wild Mountain Seeds in USA, the Desert Spirit has many varieties in its heritage, including Buttercup, our beloved Oregon Homestead Sweet Meat and others. The great diversity of genes will make a beautiful range of colours and shapes with amazing flavours. We are excited to be offering such an enthusiastically bred strain of a landrace squash.Apparently it is as vigorous as it is delicious with excellent storing qualities. *(Average seed count in regular packet - 10)*

Winter squash continued...

GREEN HOKAIDO (ORGANIC) (SWMe) **£2.50**

Cucurbita maxima

Discover the incredible Meruhen winter squash, originally from Japan. It's a truly special variety with exceptionally sweet and rich flavour—possibly even sweeter than butternut! Its flesh is slightly starchier, giving it a velvety texture that particularly shines in hearty soups and luscious sauces. The fruits are beautifully round, with dark green skin sometimes accented by pale green-grey stripes. *(Average seed count in regular packet - 13)*

OREGON HOMESTEAD SWEET MEAT (ORGANIC) (SWOH) **£2.65**

Cucurbita maxima

A large, beautiful and delicious hubbard-type pumpkin, with excellent storage qualities . This is a variety bred by Carol Deppe in Corvallis, Oregon in the USA. She spent years selecting for vigour, good cool-soil emergence, small seed cavity and premium flavour. We believe this variety is a serious contender to Crown Prince F1. It is quite a large variety with a crunchy, sweet flavour. They were extremely prolific in our 2018 squash trials and Ronja's clear favourite in taste. They are great for cooking and even raw they are a real pleasure to munch on. *(Average seed count in regular packet - 10)*

RED KURI (ORGANIC) (SWRK) **£2.80 - 5.50**

Cucurbita maxima

With its orange red skin and golden flesh, Red Kuri is a tasty globe of autumn glory. Firm but smooth, sweet and nutty, rich, creamy - you get the idea! It is Ronja's mum's favourite squash because you can cook it without having to peel it, and also for its fabulous flavour and good storage qualities.

This style of squash originates in Japan but has gained popularity in many other countries like the UK. We love growing squash and they are easy to grow, happy trailing across the ground or up a structure. *(Average seed count in regular packet - 13)*

HERBS

AGRIMONY

COMMON AGRIMONY (ORGANIC) (ZAgy) **£2.25**

Agrimonia eupatoria

Charming tall yellow meadow wildflower. It is a hardy perennial distinctive for its spikes of golden-yellow five-petalled flowers that bloom throughout summer, growing between 50-150cm tall. The flowers are a valuable food source for bees and other pollinators. It is traditionally used in herbal medicine. *(Average seed count in regular packet - 17)*

ASHWAGANDHA

ASHWAGANDHA (ORGANIC) (ZAsg) **£3.50**

Withania somnifera

Important herb from the Ayurvedic tradition with great health benefits. A tender plant which grows in temperate climates as an annual. Ashwagandha is a well regarded medicinal herb from the Ayurvedic tradition. It is now widely used in Western herbal medicine as "adaptogen" and to support the body's defences and resilience.

It will grow undercover in a greenhouse, polytunnel or large pot in a conservatory. Roots can be harvested at the end of the season. Grows 80 – 120cm tall. *(Average seed count in regular packet - 50)*

BASIL

GREEK (BUSH) (ORGANIC) (ZBGr) **£2.00**

Ocimum basilicum

Greek basil (or 'bush basil') is a great addition to the plot, its bright green foliage makes it as ornamental as it is delicious. It works really well in containers and crops well over a long period. Can be used like other basils, in sauces, salads or as a garnish. *(Average seed count in regular packet - 400)*

LEMON (ORGANIC) (ZBLn) **£2.00**

Ocimum basilicum

This unusual basil will enchant you with its wonderful lemony fragrance that is caused by a high content of citral and limonene. It has a milder taste than ordinary basil and can be used in cooking or to make a herbal tea. It also goes exceptionally well in sweet dishes adding a citrusy twist.

The plants have small, green leaves with slightly serrated edges. We just love having it growing in our polytunnel or garden and think it's worth a try if you haven't already. *(Average seed count in regular packet - 350)*

RED (ORGANIC) (ZBRd) **£2.00**

Ocimum basilicum

Red basil has both ornamental and culinary uses. We use it as garnish or to add colour to salads or made into pesto. It will look great in your garden, not to forget the amazing sweet scent of goodness when you walk past. *(Average seed count in regular packet - 350)*

Basil continued...

SWEET GENOVESE (ORGANIC) (ZBSG) **£1.95 - 3.50**

Ocimum basilicum

With large bright green leaves and a smell to die for this is an essential addition to the veg plot. We think you cannot grow too much basil, we use it in almost every meal throughout the summer months. Genovese makes the most superb pesto, aromatic without being overpowering and giving us a much needed taste of sunshine when stored or frozen and then eaten throughout the winter months.

A robust, trustworthy variety of 'The King of Herbs' with the perfect balance of aroma and subtlety. It is an essential companion to tomatoes. *(Average seed count in regular packet - 500)*

THAI (ORGANIC) (ZBTh) **£2.00**

Ocimum basilicum

Striking both in flavour and appearance, Thai basil has a more concentrated, spicy flavour than its more well known cousin with notes of anise and liquorice. It has smaller, narrow, pointed leaves with flowers and stems of a deep purple. It's perfect for Thai green and red curries and stir fries and is resilient to longer cooking methods. *(Average seed count in regular packet - 350)*

TULSI (ORGANIC) (ZBTu) **£2.25**

Ocimum tenuiflorum

Also known as 'Holy basil', a wonderful medicinal and culinary type of basil . Originating from India and South Asia tulsi has been used in ceremonial and therapeutic settings for many centuries and is often found growing around temples.

It's also used in Thai, Indian and Vietnamese cuisines to add a fragrant and heady aroma to dishes. *(Average seed count in regular packet - 200)*

BLUE SKULLCAP

BLUE SKULLCAP (ORGANIC) (ZScB) **£2.70**

Scutellaria lateriflora

Herbaceous perennial with delicate bright blue flowers. Blue Skullcap has a long history as Native American medicinal plant, as well as a wide current use in Western herbal medicine for the nervous system. It will grow in damper areas, but also thrives in a normal garden bed. It will grow 60-80cm tall. *(Average seed count in regular packet - 120)*

BLUE VERVAIN

BLUE VERVAIN (ORGANIC) (ZVeB) **£1.95**

Verbena hastata

A herb with lovely lilac flowers and spiky leaves grown as ornamental and medicinal plant. Blue Vervein is an elegant hardy herbaceous perennial, native to North America, but widely grown around the world. It has particular properties for the nervous system and can help to ease tension. The plant has delicate foliage with a purple hue, and striking spires of dainty deep purple flowers. The plants grow 1m-1.5m tall and prefer moist soil in full to partial sun. *(Average seed count in regular packet - 150)*

CELERY LEAF

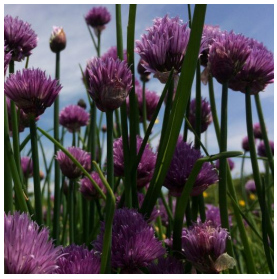

EARLY BELL (ORGANIC) (ZCLE) **£2.30**

Apium graveolens

Growing cutting celery is a great alternative to stem celery if you just want to add a bit of that delicious celery flavour to your cooking! Cutting celery is more closely related to wild celery, and has a stronger flavour. The leaves can be chopped and added to stocks, soups, and stews. As there is no need to wait for the plant to mature, the leaves can be harvested before traditional celery is ready. The plants are very hardy and will withstand a decent frost. If left in the ground over winter the plants will flower in spring producing many flowers which the bees will love! *(Average seed count in regular packet - 1350)*

CHIVES

COMMON CHIVES (ORGANIC) (ZChS) **£2.30 - 4.50**

Allium schoenoprasum

Without a doubt one the most versatile herbs! Chives are so easy to grow and can be added to just about any dish. We put them in soups, salads, omelettes, stir fries, etc. The flowers are also delicious and make a very attractive addition to summer salads, with their mild onion flavour. *(Average seed count in regular packet - 600)*

CORIANDER

FILTRO (ORGANIC) (ZCo) **£2.30 - 4.00**

Coriandrum sativum

This high-yielding variety is excellent for flavouring curries, stews, rice dishes and as a garnish for soup and in salsa. All parts of the soft, light stems and leaves can be used. The flowers grow in pretty umbels, and if left to seed, the small seed heads can be used fresh or dried and used in cooking for added flavour and texture. *(Average seed count in regular packet - 300)*

DILL

DILL (ORGANIC) (ZDi) **£2.00**

Anethum graveolens

A beautiful ancient plant originating from the Mediterranean that used to be known for its medicinal properties and is mostly utilised for culinary purposes today.

The fine feathery leaves have a flavourful complex taste and can be chopped and added to sauces to go with fish or vegetables or just sprinkled on top of your meal to add colour and flavour. Traditionally also used for pickling; try using the flowers or seeds too. *(Average seed count in regular packet - 500)*

ECHINACEA

ECHINACEA (ORGANIC) (ZEch) **£1.50**

Echinacea purpurea

A herbaceous perennial plant with stunning pink/ purple flowers late into the Autumn. Echinacea is one of the more well-known and studied medicinal plants, and because of overharvesting of wild populations has now become rare in the wild. The flowers are also beautiful in the garden and lovely as a cut flower. It grows easily in this climate, although prefers a well-drained spot as the roots can get damaged in wet winters. The new spring growth is also very attractive to slugs and may need some additional protection. *(Average seed count in regular packet - 30)*

ELECAMPANE

ELECAMPANE (ORGANIC) (ZEle) **£1.95**

Inula helenium

Tall growing perennial herb with bright yellow flowers known for its medicinal properties.. It is an impressive herbacious perennial plant, with a bitter aromatic root that has a long history and current practice of medicinal use, specifically for the lungs. Elecampane was sacred to the Celts and has rich history in folklore, it also goes by the name "elfwort" since apparently it can be used to heal 'elf-shot' (condition caused from being shot by an elf's arrow). *(Average seed count in regular packet - 50)*

EVENING PRIMROSE

EVENING PRIMROSE (ORGANIC) (ZEvP) **£2.75**

Oenothera biennis

A lovely hardy biennial wildflower and herb with lance-shaped leaves and yellow flowers that open in the evening. Loved by bees, butterflies, and moths. The nutrient-rich seeds, which contain gamma-linolenic acid (GLA), are used medicinally, and the leaves and flowers are also edible.

Evening primrose thrives in full sun in poor, well-drained soils and needs little maintenance once established. As a biennial it will create a rosette of leaves in the first year, and flower in the second year, but self-seeds readily, so will usually appear year on year once established. *(Average seed count in regular packet - 200)*

FEVERFEW

FEVERFEW (ORGANIC) (ZFvf) **£2.75**

Tanacetum parthenium

Pretty and hardy herbaceous perennial with medicinal benefits. Feverfew is a bushy short-lived perennial with daisy-like flowers and serrated aromatic
leaves, growing 60 to 80cm tall. It has traditional medicinal uses for migraine and headaches.
Feverfew is easy to grow and thrives in full sun to part shade, in well drained soil. It is great for pollinators and other beneficial insects too. *(Average seed count in regular packet - 350)*

GERMAN CHAMOMILE

GERMAN CHAMOMILE (ORGANIC) (ZChm) **£1.50**

Matricaria recutita

A familiar annual plant with daisy like flowers, which will self seed in situ to grow again the next year. Beautiful white daisy like flowers, around 60cm tall ,with a long history of medicinal use as a safe and gentle herb. Well recognised as a calming tea. *(Average seed count in regular packet - 1000)*

HYSSOP

HYSSOP (ORGANIC) (ZHs) **£1.50**

Hyssopus officinalis

Semi-evergreen perennial, with aromatic leaves and flowers. Hyssop has traditional medicinal uses, particularly related to the respiratory system, and is also a great plant for pollinators. This is the traditional blue hyssop, which has beautiful bright blue flowers from summer to early autumn, up to around 80cm tall. It likes similar conditions to Rosemary and Thyme, so sunny and well drained. *(Average seed count in regular packet - 300)*

KOREAN MINT

KOREAN MINT (ORGANIC) (ZKM) **£1.95**

Agastache rugosa

Herbaceous perennial plant with spires of lilac/ purple flowers that are hugely attractive to wildlife. Korean mint grows up to 1m tall with flowers that are particularly interesting to hoverflies and bumblebees. It is one of the core 50 herbs in Chinese medicine, and makes a delicious tea which has a minty liquorice flavour. Once established the plants will expand gradually in a clump, which can be divided every few years. *(Average seed count in regular packet - 250)*

LEMON BALM

LEMON BALM (ORGANIC) (ZLeB) **£2.30**

Melissa officinalis

Popular medicinal herb with delicate lemon fragrance. Fresh leaves of Lemon Balm make a delicious tea, or can be used fresh in salads. The herb has a long history as a medicinal plant for the nervous system and as mood up-lifting. A robust plant well suited for the British climate and easy to grow. *(Average seed count in regular packet - 130)*

MARSHMALLOW

MARSHMALLOW (ORGANIC) (ZMsh) **£1.95**

Althaea officinalis

Herbaceous perennial with beautiful soft leaves and white flowers with pink tinges on tall spires. The roots have traditional medicinal properties as a demulcent, and when boiled up form a soft mucilage, which is the basis of what we now know as marshmallows. Marshmallow will grow in damper areas, but will also thrive in a normal garden bed. It will grow 90-120cm tall. *(Average seed count in regular packet - 100)*

MOTHERWORT

MOTHERWORT (ORGANIC) (ZMot) **£2.25**

Leonorus cardiaca

Herbaceous perennial plant used in herbal medicine. A striking plant with traditional and current uses in herbal medicine for the heart (hence the species name cardiaca), and in women's health.

Will grow 60 - 120 cm tall; blooms between July and September. You will find soft pale pink flowers surrounded by prickly spikes on the stems. Harvest the aerial parts when they start to flower. Prefers well drained soil, and sun or part shade. *(Average seed count in regular packet - 80)*

MULLEIN

COMMON MULLEIN (ORGANIC) (ZMul) **£2.50**

Verbascum thapsus

Native biennial wildflower with velvety leaves and tall spikes of bright yellow flowers. A striking plant, Mullein is a tall, architectural plant with soft, silvery leaves and towering spikes of bright yellow flowers in its second year, growing 1 to 2m tall. It is a fantastic addition to wildlife gardens, attracting bees, butterflies, and other pollinators. Mullein thrives in poor, well-drained soils and is highly drought-tolerant. Historically used in herbal medicine for respiratory support. *(Average seed count in regular packet - 150)*

PARSLEY

CURLY: MOSS CURLED (ORGANIC) (ZPMC) **£1.95**

Petroselinum crispum

Moss Curled is an early maturing variety that was introduced in the 1800s. Its leaves are finely curled like moss and can be used to flavour soups and salads, and many other dishes. It is particularly good for garnishes as the leaves are less likely to bruise when chopped. *(Average seed count in regular packet - 600)*

ITALIAN GIANT (ORGANIC) (ZPIG) **£1.95**

Petroselinum crispum

Parsley is probably the most well-known herb in the world. It is native to the Mediterranean region and was first grown mostly for medicinal purposes. It seems to have become more commonly used in Northern Europe since the Middle Ages and is today's favourite for garnishing, in salads and for cooking.

This Italian variety grows an abundance of dark green leaves. It can be grown in pots as well as in the ground all year round. *(Average seed count in regular packet - 600)*

SELFHEAL

SELFHEAL (ORGANIC) (ZSlfh) **£2.25**

Prunella vulgaris

A hardy, low-growing perennial traditionally used as a medicinal herb but also wonderful as an ornamental. Self-Heal is a valuable addition to wildflower meadows, pollinator gardens, and herbal plantings. Producing charming purple-blue flower spikes from late spring to early autumn, it attracts bees and butterflies while providing ground cover with its spreading habit. It prefers well-drained soil and full sun to partial shade. Easy to grow and drought-tolerant once established, it reaches a height of 6-12 inches. Perfect for naturalised plantings and wildlife-friendly spaces. *(Average seed count in regular packet - 150)*

SHISO

PURPLE (ORGANIC) (ZSh) **£2.50**

Perilla frutescens

A culinary herb from Japan, Shiso produces deep purple leaves with serrated patterning and an aromatic taste profile of cumin, cinnamon and anise. Shiso can be used as both a garnish and as a colourful and flavoursome addition to your salad mix or stir fries. It's also traditionally used in pickling, including umeboshi, the Japanese sour plum pickle and tinges everything a plum purple. *(Average seed count in regular packet - 200)*

SORREL

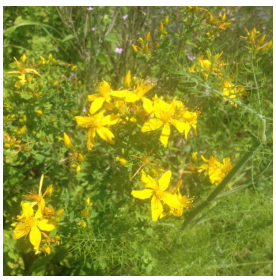

FRENCH (ORGANIC) (ZFS) **£2.20**

Rumex scutatus

French sorrel grows in clumps of 15cm high by 20cm wide. It is easy to grow and easy to pick. Developed in Italy and France in the Middle Ages, the tangy and slightly tart taste packs a punch. Use as a herb, salad leaf or leafy green. Perfect for adding an edge to rich and heavy meals. *(Average seed count in regular packet - 350)*

ST JOHN'S WORT

ST JOHN'S WORT (ORGANIC) (ZStJ) **£1.60**

Hypericum perforatum

Herbaceous perennial with bright yellow flowers from midsummer. St Johns wort has well researched medicinal properties, and a long history as a medicinal plant. It grows happily in a meadow or in a bed and gets 30-60cm tall. It self-seeds easily and spreads around. This is not a issue in the UK as it is a native wildflower. *(Average seed count in regular packet - 300)*

GRAINS

CHIA

New for 2027

CHIA (ORGANIC) (GrCh) **£2.25**

Salvia hispanica

Grow your very own superfood. Grown for its nutritious seeds, the plants have beautiful blue and purple flowers that are also attractive to pollinators. A member of the mint family, Chia can grow up to 5 feet tall and can be sown directly outside after the risk of frost has passed. Chia seeds are rich in dietary fibre and Omega 3 oils as well as being a great source of protein. *(Average seed count in regular packet - 350)*

QUINOA

New for 2027

WILD GARDEN BREEDERS MIX (ORGANIC) (GrQW) **£2.25**

Chenopodium quinoa

An incredibly diverse population of Quinoa developed by Frank Morton of Wild Garden Seeds. This mix contains a wonderful range of colours, sizes and diversity - sure to thrill the seed enthusiast and breeding opportunity. Quinoa is a wonderful multi-use crop with nutritious, edible leaves and seeds that can be treated like a grain. *(Average seed count in regular packet - 400)*

FLOWERS

AMARANTH

GREEN TAILS (ORGANIC) (XAmGT) **£1.95**

Amaranthus caudatus

A beautiful annual amaranth variety with lengths of ornamental tassels in a vibrant chartreuse. They are heat-loving and fast growing and bloom throughout the summer. They are an exotic and dramatic addition to the cutting garden, great for adding texture to flower arrangements. *(Average seed count in regular packet - 1000)*

HOT BISCUITS (ORGANIC) (XAmHB) **£1.95**

Amaranthus caudatus

An annual beautiful copper amaranth variety producing spires of ornamental spikes . Hot Biscuits is a fantastic addition to any cutting garden, producing tall blooms of striking copper plumes that look fantastic fresh or dried in a bouquet or arrangement. It's easy to grow and produces an abundance of stems that pair fantastically with dahlias, sunflowers and rudbeckias. Standing up to 120cm tall, it's also an edible plant with leaves that can be cooked like spinach and seeds which can be used as a gluten-free flour or cooked as a nutritious grain. *(Average seed count in regular packet - 1000)*

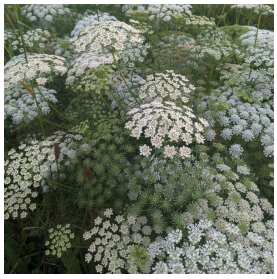

LOVE LIES BLEEDING (ORGANIC) (XAmL) **£1.95**

Amaranthus caudatus

Unusual and impressive plants with tassels of deep pink. The drooping tassle-like clusters of tiny bright coloured flowers seem to pour down from the tall plants with pale green foliage. They are heat-loving and fast growing and bloom throughout the summer.

Exotic and dramatic plants to grow in the garden, great for adding texture to flower arrangements too. *(Average seed count in regular packet - 1000)*

AMMI

AMMI MAJUS/ BISHOP'S FLOWER (ORGANIC) (XAMj) **£1.95**

Ammi majus

Popular filler for flower arrangements with lacy flower heads . This tall, branching plant with crisp white flower heads and finely feathered foliage provide invaluable additions to late spring and early summer bouquets. Ammi majus is one of the most useful and productive filler flowers you can grow from seed. Air dry flowers for two to three weeks in a dark, dry place for making dried flowers. Darkness is necessary to keep the flowers white. *(Average seed count in regular packet - 500)*

GREEN MIST (ORGANIC) (XAVs) **£1.75**

Ammi visnaga

Visnaga is a robust version of Ammi, producing dense and delicate white flowers perfect for the cutting garden. Ammi Visnaga is hardy annual that produces an abundance of white frothy Angelica-like flowers with delicate green foliage. It can grow up to 120cm tall and is a fantastic addition to any ornamental garden or as a cut flower for bouquets or arrangements from June - September. *(Average seed count in regular packet - 1000)*

ASTER

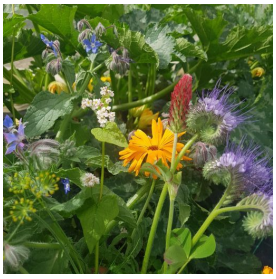

SINGLE MIX (ORGANIC) (XAs) **£2.34**

Aster amellus

A beauty of the garden with radiant star-like colourful blooms. Gardeners and insects alike love asters. They are great for bringing in beneficial insects to the garden. We love this annual mix due to the variety of colours it produces.

(Average seed count in regular packet - 100)

BEE MIXTURE

BEE MIXTURE (ORGANIC) (XBM) **£2.92**

The bees and other beneficial insects in your garden will love this mixture of flowering plants. The nectar will provide them with sugar they need for energy and the pollen contains protein and oils that bees collect to raise the brood.

We rejoice in this bee mixture particularly as it has a diverse range of flowering plants and makes our vegetable plot look beautiful and filled with colour. The edibles amongst the mix we use to jazz up our summer salads. *(Average seed count in regular packet - 5)*

BORAGE

BORAGE (ORGANIC) (XBor) **£1.60**

Borago officinalis

No nature-friendly garden is complete without this wonderful annual flower. It is a prolific self-seeder so you may only need to sow it once to have it forever. *(Average seed count in regular packet - 60)*

WHITE (ORGANIC) (XBorW) **£1.95**

Borago officinalis

Adored by bees and humans alike, this variety of borage produces an abundance of delicate, edible white flowers. Borage is a must-addition for any ornamental or kitchen garden, with its tall stems, abundant flowers and edible petals. No nature-friendly garden is complete without this wonderful annual flower. It is a prolific self-seeder so you may only need to sow it once to have it forever. *(Average seed count in regular packet - 60)*

CALENDULA

IVORY PRINCESS (ORGANIC) (XCalP) **£2.50**

Calendula officinalis

Large double and semi-double creamy-yellow blooms with a contrasting dark centre disk. This is a wonderful new addition to our catalogue for 2024, we have totally fallen in love with this variety. The delicate and contrasting colours make it a superb addition to the garden and it looks wonderful in bouquets.

Its long stem length compared to other calendulas we've grown make it particularly suitable as a cut flower. *(Average seed count in regular packet - 100)*

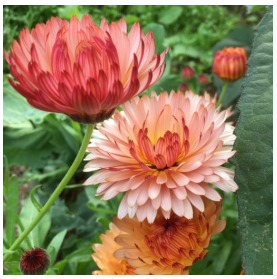

Calendula continued...

ORANGE (ORGANIC) (XCa) **£2.28 - 3.90**

Calendula officinalis

We love calendula and would never go a season without it. It is really easy to grow and loved by humans and insects alike. There is something magical about finding bumblebees sleeping in calendula flowers early in the morning. The flowers are edible and make a great addition to salads. The petals have good medicinal properties and can be taken as an infusion in hot water or turned into a powerful tincture. Calendula's medicinal actions include but are not limited to: anti-inflamatory, astringent, vulnery, and anti-microbial. *(Average seed count in regular packet - 125)*

TRIANGLE FLASHBACK / ZEOLIGHTS (ORGANIC) (XCaZ) **£2.58**

Calendula officinalis

This calendula variety is a real treasure. Pastel shades of orange, pink and peach are tinged with yellow towards the petal base. The backs of the petals are maroon. A pure joy to look at. We were so excited to have found this strain of calendula, bred by Frank Morton from Wild Garden Seeds in Oregon, USA. The flowers don't only look good in the garden or as cut flower, they are also edible and can be used for medicinal purposes, too. An abundance of beauty for your garden! *(Average seed count in regular packet - 100)*

CARROT

DARA (ORGANIC) (XDara) **£2.20**

Daucus carota

A variety of carrot bred for its white delicate umbels that turn pink once opened. Dara is a staple in any cut flower garden, producing abundant delicate stems that are often ready just as Ammi finishes. They are a fantastic variety for pollinators and attract a wide range of beetles, hover flies and bees. The seed heads are good for drying and it be autumn sown for early blooms in spring. *(Average seed count in regular packet - 150)*

CELOSIA

FLAMINGO FEATHER (ORGANIC) (XCeFF) **£2.50**

Celosia argentea

A beautiful variety producing white flower spikes with striking pink tips. We love this variety for its feathery plumes which make a great cut flower for bouquets. Bunches can also be hung and dried upside down as everlasting flowers for winter decoration. *(Average seed count in regular packet - 100)*

New for 2027

PINK CHAMPAGNE (ORGANIC) (XCePC) **£2.50**

Celosia argentea

An exotic and beautiful variety of Celosia, producing large coral-like apricot plumes on a triangular green base . A great addition to any cut flower garden, adding drama and interest to any dried or fresh arrangements. *(Average seed count in regular packet - 100)*

Celosia continued...

VINTAGE ROSE (ORGANIC) (XCeVR) **£2.50**

Celosia argentea

Most beautiful tones of silvery blush pink and cream colours, great for fresh and dried bouquets. What a delight having these plumes growing in the garden. Very elegant as a cut flower and it goes in almost any bouquet with their silvery cream, warm pink and peachy palette against dark green foliage.

Celosia keeps its colours when dried. This variety lives up to its name when hung and dry, the colours fade ever so slightly and get even more of a vintage feel to them. *(Average seed count in regular packet - 100)*

CHOCOLATE COSMOS

CHOCOLATE (ORGANIC) (XCoCh) **£6.20**

Cosmos atrosanguineus

A gardeners favourite producing an abundance of small Dahlia-like dark maroon flowers . Native to Mexico, Chocolate Cosmos gets its name from its delicious chocolate-vanilla scent and is the perfect choice for easy container growing with its squat, densely flowered stems. Expect up to 5 days of vase life once cut. *(Average seed count in regular packet - 20)*

COREOPSIS

DYER'S COREOPSIS (ORGANIC) (XCT) **£2.40**

Coreopsis tinctoria

No dye garden would be complete without the addition of Coreopsis, otherwise known as Dyer's Tickseed. With cheerful beautiful blooms of bright yellow and a ruby heart, Coreopsis flowers produce a beautiful warm orange natural dye. It's also a beautiful addition to the garden border for it's tall stem length, drought tolerance and long flowering window, producing masses of flowers from midsummer to autumn. *(Average seed count in regular packet - 300)*

ROULETTE (ORGANIC) (XCTR) **£2.40**

Coreopsis tinctoria

A lovely Coreopsis variety with cheerful ruby red blooms and inner golden petals. No dye garden is without the addition of Coreopsis and this variety produces a beautiful warm orange natural dye. It's tall stem length also make it a beautiful addition to the garden border as well its abundance of flowers from midsummer - autumn. *(Average seed count in regular packet - 300)*

CORNFLOWER

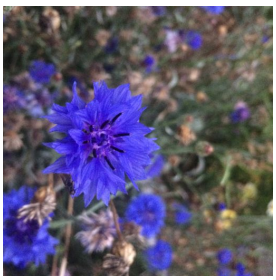

BLACK BALL (ORGANIC) (XCFBB) **£2.25**

Centaurea cyanus

A quirky variety producing very dark maroon double blooms. The flowers are so dark they are almost black and have a very dramatic appearance. They make a great cut flower, as well as looking fantastic in the garden. As with all cornflowers, they are edible too. *(Average seed count in regular packet - 130)*

Cornflower continued...

BLUE (ORGANIC) (XCF) **£2.10**

Centaurea cyanus

A flower that makes every garden happy. Cornflowers produce masses of stunning blue shaded blooms and attract bees and other insects as well. They were once native to European corn fields, but have mostly disappeared from the landscape due to large scale use of herbicides. Today they are mainly fond in gardens and allotments - we grow them in amongst our vegetables. *(Average seed count in regular packet - 200)*

CLASSIC MAGIC (ORGANIC) (XCFCM) **£2.40**

Centaurea cyanus

A unique variety producing stunning blooms in mauves, pinks, maroons and violets that are highlighted by delicate, feathery foliage. Classic Magic is a prolific bloomer that is easy to grow and maintain, making it a popular choice among gardeners of all skill levels. Edible petals make an attractive decoration to cakes and as garnishes. Whether you're growing for a visual treat or a culinary one, this variety is a total show-stopper! *(Average seed count in regular packet - 150)*

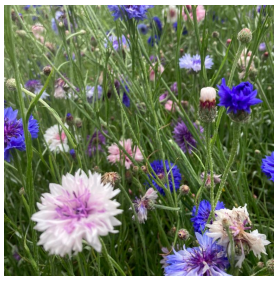

New for 2027

CLASSIC ROMANTIC (ORGANIC) (XCFCR) **£2.40**

Centaurea cyanus

A beautiful mix of pink, white, red and bicolour flowers. Classic Romantic is a wonderful mixed cornflower variety. *(Average seed count in regular packet - 130)*

MIXED (ORGANIC) (XCFx) **£2.10**

Centaurea cyanus

A stunning mix of pink, blue and white double flowered blooms, ideal for the border and for the cutting garden. *(Average seed count in regular packet - 200)*

COSMOS

APRICOTTA (ORGANIC) (XCoA) **£2.50**

Cosmos bipinnatus

Apricot to peachy colours with a soft pink towards the centre. This cosmos is unlike any other we have seen. The blooms appear to have a iridescent glow which is quite remarkable. They are a head-turner to say the least! *(Average seed count in regular packet - 35)*

Cosmos continued...

COSMOS (ORGANIC) (XCo) **£1.83**

Cosmos bipinnatus

Single, daisy-like flowers in purple, pink or white that will bloom from early summer to autumn. Cosmos is easy to grow, it's great for bees, butterflies and hover-flies and makes a lovely cut flower, too.

We like planting it in between food crops as an ornamental divider. *(Average seed count in regular packet - 100)*

KIIRO (ORGANIC) (XCoK) **£2.35**

Cosmos bipinnatus

A gorgeous variety producing pale buttery-yellow blooms with single petals. No garden would be complete without a few Cosmos plants, with their long stem length, abundant blooms and long flowering window.

Kiiro is a lovely addition to our collection, with a soft delicate colour palette. Like other Cosmos, it's very easy to grow and great for beginners, also being suitable for pot growing as well as the garden border. *(Average seed count in regular packet - 70)*

ORANGE (ORGANIC) (XCoO) **£2.34**

Cosmos sulphureus

This beautiful eye-catching orange flower will bring you joy from early summer until fall. It tolerates poor soils and dry conditions and attracts bees, butterflies and other insects.

We find Orange Cosmos easy to grow and it will self-seed if allowed to. *(Average seed count in regular packet - 50)*

PINK MOSAIC (ORGANIC) (XCoPM) **£2.40**

Cosmos bipinnatus

A stunning cosmos variety with mottled and flecked double petals in gradients of magenta and white. An unmissable addition to any cutting garden, cosmos are a workhorse for cut flower enthusiasts. They are easy to grow, great for pollinators and provide endless blooms throughout the summer with long upright stems. *(Average seed count in regular packet - 70)*

VELOUETTE (ORGANIC) (XCosV) **£2.30**

Cosmos bipinnatus

An interesting variety with a striking colour scheme of reds pinks and whites. This cosmos is a real eye catcher, and produces a range of different flower types. Some are red with clear white stripes, others are white with pink edges, the rest are somewhere in between. *(Average seed count in regular packet - 100)*

CRASPEDIA

DRUMSTICK (ORGANIC) (XDrBB) **£2.15**

Craspedia globosa

An ever popular cut flower great for drying, adding unusual colourful stems perfect for arranging . With bright yellow globes on upright stalks, this variety is a must for the dried flower enthusiast. It can be treated as a perennial with extra protection over winter, resulting in larger and more abundant blooms in the second year. *(Average seed count in regular packet - 100)*

CRESS

EMERALD BEADS (ORGANIC) (XCrEB) **£2.50**

Lepidium setatum

A highly versatile and textured filler in any cut flower arrangement when left to go to seed. It's not just a sandwich filler! With an upright habit and plums of dainty intricate stems and a long vase life, it makes the perfect addition to the cutting garden. It's easy to grow and also works wonderfully as a dried flower, turning golden in colour as autumn approaches *(Average seed count in regular packet - 200)*

DYERS CHAMOMILE

DYER'S CHAMOMILE (ORGANIC) (XDC) **£2.20**

Anthemis tinctoria

With a sprawling daisy-like habit and blue-green foliage, it's cheerful blooms produce a bright cadium yellow natural dye. This variety is a short-lived perennial and like other chamomiles it will self seed in situ to grow again the next year. *(Average seed count in regular packet - 300)*

EVERLASTING SANDFLOWER

EVERLASTING SANDFLOWER (ORGANIC) (XEvS) **£2.25**

Ammobium alatum

A delightful everlasting flower, with delicate daisy-like flowers on tall, branching stems. Bearing flowers all summer long, from June - September, this variety is an excellent addition to a cutting garden and dries beautifully for winter arrangements. *(Average seed count in regular packet - 500)*

FRENCH MARIGOLD

BURNING EMBERS (ORGANIC) (XFMBE) **£2.50**

Tagetes patula

A tall variety with deep orange-red petals and pale outlines. This is a wonderful variety of tagetes which grows taller than the classic French marigold. The petals have a deep colour and almost appear to glow like burning embers.

Plant between tomatoes to ward off pests and add a shock of colour to the patch. *(Average seed count in regular packet - 100)*

CRACKERJACK (ORGANIC) (XFMCJ) **£2.40**

Tagetes erecta

A marigold variety that is great for natural dyeing and has gorgeous blooms in orange and yellow. Loved by pollinators for their strong scent, they are a reliable workhorse in the garden producing masses of cheerful blooms on slightly longer stems from July long into September. This variety is often grown as a dye plant, producing a deep and colourfast golden mustard on plant and animal fibres. *(Average seed count in regular packet - 100)*

ORANGE (ORGANIC) (XFM) **£2.34**

Tagetes patula

Tagetes is a very rewarding plant. It is easy to grow and produces an abundance of stunning yellow to red coloured flowers. It also makes a great companion plant as the scent is disliked by flies and other insects and the roots produce secretions that have insecticidal and nematicidal (against harmful nematodes) effects. It can also be planted in pots or containers and will embellish gardens, doorsteps and balconies. *(Average seed count in regular packet - 400)*

GLOBE AMARANTH

New for 2027

ROSE (ORGANIC) (XGAR) **£2.20**

Gomphrena globosa

Beautiful clover-like pink blooms on long stems, ideal for cutting fresh or drying. 'Rose' is a stunning variety of globe amaranth, producing an abundance of delicate flowers over a long harvest period.

The flowers are also edible and are used as a garnish or to make a tea from. *(Average seed count in regular packet - 220)*

HELICHRYSUM

MONSTROSUM (ORGANIC) (XHeM) **£1.85**

Helichrysum bracteatum

A tall variety producing an abundance of multi-coloured blooms. This is a wonderful and vibrant helichrysum mix, whose bright blooms look like delicious boiled sweets!

The blooms lend themselves to both fresh and dried flower arrangements so are a great all-rounder. *(Average seed count in regular packet - 200)*

Helichrysum continued...

PURPLE RED (ORGANIC) (XHeDF) **£1.95**

Helichrysum bracteatum

A dried flower enthusiast's favourite in a gorgeous vibrant hue. Known for its delicate, papery flowers, this variety is a must have for any flower arrangement with tall stems that are long lasting and keep their vibrant colour once dried. They are also an excellent addition to the garden border, adding beautiful contrast and structure. They are a fantastic choice for pollinators are easy to grow and drought-tolerant. *(Average seed count in regular packet - 200)*

SALMON ROSE (ORGANIC) (XHeSR) **£1.95**

Helichrysum bracteatum

A beautiful variety producing blooms of peach, salmon and pale orange. This is probably our favourite variety of helichrysum, its subtle and delicate tones look stunning in a bouquet or vase. The cut stems can be hung up and dried for use in winter flower arrangements or just left hanging as decoration. *(Average seed count in regular packet - 200)*

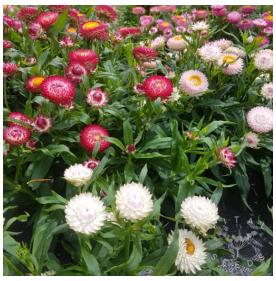

SILVERY ROSE (ORGANIC) (XHeSv) **£1.95**

Helichrysum bracteatum

Delicate papery blooms of pink through to white, equally at home in the border, the vase, or as a dried bunch. This is a new variety for us and we totally love it! The pale blush pink petals are borne on good strong stems, and if flowers are either cut or deadheaded the plants will keep producing over a very long period.

A top favourite for wedding bouquets due to the exquisite delicate and unfolding nature of the blooms. *(Average seed count in regular packet - 200)*

STRAWFLOWER (ORGANIC) (XHe) **£1.85**

Helichrysum bracteatum

Strawflowers (also known as 'everlasting flowers') are a beautiful addition to the garden. They are perfectly suited for drying, just cut the stem before they are fully open and hang in bunches upside down in a dry place out of direct sunlight. They are also great as a fresh flower for use in bouquets. We love the bright colours in this mix, they remind us of colourful boiled sweets! *(Average seed count in regular packet - 200)*

New for 2027

YELLOW (ORGANIC) (XHeY) **£1.95**

Helichrysum bracteatum

With vibrant sunshine yellow blooms for fresh and dried flower arrangements. Cheerful yellow colours of this everlasting favourite. The sturdy plants produce papery, daisy-like flowers on long stems, flowering generously through summer and into autumn.

These flowers are perfect for cutting and they keep their colour and shape beautifully when dried. Brings a lovely splash of golden yellow to borders, bouquets and dried flower arrangements. *(Average seed count in regular packet - 200)*

HOLLYHOCK

BLACK (ORGANIC) (XHhN) **£2.50**

Alcea Rosa var nigra

A beautiful variety of Hollyhock with towering blooms and a deep plum - almost black - flowers. The classic cottage garden flower, Hollyhocks look fantastic at the back of a sunny border with stems up to 2m. It's a short-lived perrenial and a great choice for pollinators and will self-seed readily. *(Average seed count in regular packet - 50)*

LARKSPUR

SMOKEY EYES (ORGANIC) (XLkSy) **£2.50**

Delphinium consolida

Beautiful spires of dusky purple petals with delicate white/green centres. A must-have addition to any cottage garden, Smokey Eyes is a garden workhorse, producing continuous blooms throughout the summer with a long-lasting vase life. Also a great choice for drying. *(Average seed count in regular packet - 100)*

LUPIN

BAND OF NOBLES SERIES "THE PAGES" (ORGANIC) (XLuP) **£2.00**

Lupinus mutabilis

A beautiful lupin variety producing towers of hot pink spires. With strong branching stems and densely packed petals, the blooms make an ideal cut flower and look great as an ornamental addition to the garden border. *(Average seed count in regular packet - 80)*

New for 2027

JAVELIN WHITE (ORGANIC) (XLuJ) **£2.25**

Lupinus mutabilis

Beautiful and elegant spires with white florets and yellow throats. 'Javelin White' is a stunning lupin variety with a fragrance that is to die for. We love having its striking presence in our flower patch and the divine scent which wafts across the field is an added treat for the senses.

We harvested a bunch for a photograph and kept them in our office for a week and everyone that came through asked what the amazing smell was!

SUNRISE (ORGANIC) (XLuS) **£2.25**

Lupinus mutabilis

A beautiful lupin producing multicoloured blooms of azure blue, white and yellow. We are really wowed by this variety, and frequently stop just to admire it when we walk past it in the field.

The incredibly cheerfully coloured blooms are borne on strong stems making it ideal for cutting as well in the border. *(Average seed count in regular packet - 25)*

MADDER

MADDER (ORGANIC)

(XMad) **£3.25**

Rubia tinctorum

(Average seed count in regular packet - 40)

MEADOWSWEET

MEADOWSWEET (ORGANIC)

(ZMs) **£1.50**

Filipendula ulmaria

Herbaceous wildflower with creamy white "frothy" flowers known for its medicinal properties. Meadowsweet is a hardy perennial plant and medicinal herb with highly aromatic 'frothy' cream flowers in early to mid summer. Known for being a flavour in traditional mead as well as being the origin of salicylic acid, the active ingredient in aspirin, meadowsweet is usually indicated in digestive conditions. The plants grow to around 1.2m tall in sun and with a moist to average soil. *(Average seed count in regular packet - 50)*

NASTURTIUM

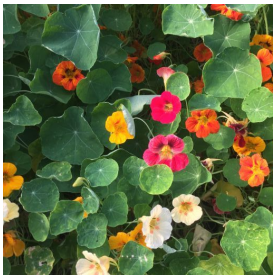

BLOODY MARY (ORGANIC)

(XNaBM) **£2.70**

Tropaeolum majus

Beautiful nasturtium variety with flecked yellow and red flowers that turn progressively darker as they mature. With a distinctive patterning this variety makes a great choice, especially in a kitchen garden as an edible flower *(Average seed count in regular packet - 20)*

NASTURTIUM DWARF (ORGANIC)

(XNaD) **£2.58**

Tropaeolum majus

With different shades of orange, yellow, cream, red and pink, nasturtiums are commonly grown for its pretty big blooms and bright green round leaves. Both leaves and flowers are edible with a taste peppery and sweet flavour.

We love having nasturtium flowers dotted around our land. They attract the bees and just make a beautiful addition in summer salads. *(Average seed count in regular packet - 40)*

PURPLE EMPEROR (ORGANIC)

(XNaE) **£2.70**

Tropaeolum majus

A beautiful variety producing deep purple flowers with a contrasting yellow throat. We love this variety of nasturtium for its attractive pastel purple flowers, which it produces in abundance over a long season.

The flowers are delicious and add a spicy sweetness to salads. *(Average seed count in regular packet - 20)*

Nasturtium continued...

TRAILING (ORGANIC) (XNas) **£2.58 - 6.95**

Tropaeolum majus

Trailing mix of bright greenery and different shades of orange, yellow and red coloured flowers. Both leaves and flowers are edible, they taste peppery, hot and sweet.

We love having nasturtium flowers dotted around our land. They attract the bees and just make a beautiful addition in summer salads. *(Average seed count in regular packet - 35)*

NICOTIANA

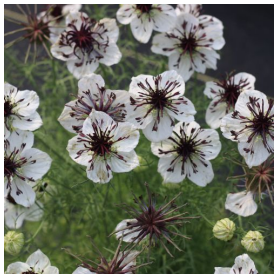

LIME GREEN (ORGANIC) (XNcL) **£1.95**

Nicotiana alata

An enchanting flowering tobacco with lime green coloured blooms from early summer. This popular cut flower features graceful, elongated trumpets of lime-green blooms that emit a subtle, sweet fragrance. The charming flowers come alive, especially in the evening when they attract moths during their nightly flight as pollinators. Perfect for both garden display and cut arrangements, they add elegance and fragrance to any setting. *(Average seed count in regular packet - 2000)*

NIGELLA

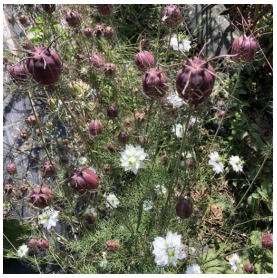

AFRICAN BRIDE (ORGANIC) (XNiAB) **£2.25**

Nigella papillosa

White petals with contrasting dark maroon spidery centres borne on delicate green foliage. We totally love this variety and regularly had to stop and admire it as we walked past it in the field. It's a really prolific producer of some of the most elegant blooms we have ever grown.

The flowers have a great vase life and develop into striking dark ornamental seed pods after the petals have dropped. *(Average seed count in regular packet - 200)*

CRAMERS PLUM (ORGANIC) (XNiCP) **£2.25**

Nigella damascena

Delicate white double flowers sit atop a misty spray of delicate green foliage. Cramers Plum is a great variety in the cutting garden, producing abundant blooms and deep plum coloured seed pods that are fantastic for arranging and that keep their colour when dried. *(Average seed count in regular packet - 200)*

DELFT BLUE (ORGANIC) (XNiDB) **£2.25**

Nigella papillosa

A popular cut flower that's long lasting and great for arranging and drying. Also known as Love-in-a-Mist, these hardy annuals take their name from the lovely delicate tendrils that surround each flower head. This variety has beautiful purple streaks lining each petal and is a great workhorse for the cut flower enthusiast, producing abundant flowers and seed pods great for arranging and drying. *(Average seed count in regular packet - 150)*

Nigella continued...

MIDNIGHT (ORGANIC) (XNiM) **£2.25**

Nigella papillosa

Rich dark purple flowers with spidery seed pods. This is a striking variety of nigella ideal for florestry due its deep colours and quirky seed pods, which can be used both fresh and dried. *(Average seed count in regular packet - 150)*

MISS JEKYLL (ORGANIC) (XNiJB) **£2.35**

Nigella damascena

Pale blue mostly double flowers, sit atop a misty spray of delicate green foliage. A delightful sight in any garden or allotment and an excellent crop for attracting beneficial pollinators into your space. 'Miss Jekylls' captivating blooms are perfection in borders for cut flower arrangements and after the pods swell and dry the edible seeds can be harvested utilising the attractive seed head for dry flower crafts. *(Average seed count in regular packet - 200)*

MISS JEKYLL ROSE (ORGANIC) (XNiJR) **£2.25**

Nigella damascena

A popular cut flower that's long-lasting and great for arranging and drying. Also known as Love in a Mist, these hardy annuals take their name from the lovely delicate tendrils that surround each flower head. This variety has beautiful pink petals and is a great workhorse for the cut flower enthusiast, producing abundant flowers and seed pods great for arranging and drying. *(Average seed count in regular packet - 200)*

NIGELLA DAMASCENA (ORGANIC) (XNi) **£2.34**

Nigella damascena

Nigella flowers or 'love-in-a-mist' are a popular and traditional cottage garden flower. The blue, pink and white solitary flowers appear to sit on a bed of 'misty' foliage, hence the common name. The plants get about 50cm high and the blossom is followed by a decorative, inflated seed capsule that also makes a nice addition to cut flower arrangements. *(Average seed count in regular packet - 200)*

ORLAYA

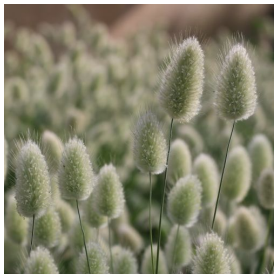

ORLAYA (ORGANIC) (XOyG) **£1.95**

Orlaya Grandiflora

With delicate white flowers and easy to pair stems, this is a great addition to any cut flower garden. The beautiful lace-like umbels of Orlaya Grandiflora work well as great filler for early spring bouquets and the more you cut, the more blooms you will be rewarded with. *(Average seed count in regular packet - 50)*

ORNAMENTAL GRASS

BUNNY TAILS (ORGANIC) (XBT) **£2.50**

Lagurus ovatus

A cutting garden staple that produces beautiful ornamental grass heads that resemble soft bunny tails. Bunny Tail Grass is a clump forming variety, producing an abundance of delicate stems from July - September. It's also a great variety for drying, turning straw-coloured when dried and keeping its softness. *(Average seed count in regular packet - 300)*

GREATER QUAKING GRASS (ORGANIC) (XBrMx) **£2.20**

Briza Maxima

An essential annual grass for cut flower growers, Briza Maxima adds delicate beauty to any arrangement or garden. This variety is also known as Greater Quaking Grass which describes its beautiful heart shaped heads that nod in the breeze and shine as they catch the light. Briza Maxima produces stems from June - August and is also great for drying, turning straw-coloured when dried. *(Average seed count in regular packet - 200)*

PHACELIA

PHACELIA (ORGANIC) (XPh) **£1.95**

Phacelia tanacetifolia

Phacelia is extremely attractive to honeybees and other beneficial insects providing both pollen and nectar. It is a quick growing annual flower that germinates at low temperatures and has the potential to catch excess nitrogen too. We love sowing it in between our crops and rejoicing in the lovely flowers and insects that it attracts. *(Average seed count in regular packet - 1000)*

POPPY BREADSEED

GIGANTEUM (ORGANIC) (XPoGig) **£1.95**

Papaver somniferum

A variety bred specifically for its large decorative seed pods - perfect for the floral arranger. Giganteum is a staple in any cut flower garden, producing an abundance of enormous seed heads perfect for drying or arranging. While not long lived, the flowers also add a splash of vibrant pink to the garden border, blooming all summer long. *(Average seed count in regular packet - 500)*

HUNGARIAN BLUE (ORGANIC) (XPoHB) **£2.20**

Papaver somniferum

An old variety with delicate purple silky flowers and large seed pods. This variety was traditionally grown for it's delicious and nutritious seeds, often used in baking.

However it's a true multipurpose crop producing beautiful flowers and dried seed heads which make a striking addition to flower arrangements. *(Average seed count in regular packet - 500)*

Poppy Breadseed continued...

WHITE FRILLS (ORGANIC) (XPoWF) **£2.45**
Papaver somniferum
A riot of spectacular white fluffy orbs followed by large decorative seed pods. This is a really unique variety of breadseed poppy, we were stunned by the dramatic explosion of blooms when their buds burst open. The flowers are as spectacular as they are short lived! Luckily the beautiful seed pods that follow will last indefinitely as a dried decoration. *(Average seed count in regular packet - 500)*

POPPY CALIFORNIA

CALIFORNIA POPPY (ORGANIC) (XPCa) **£2.20**
Eschscholzia californica
It's Latin name Escholzia Californica traces back to the physician Dr Johann Friedrich Eschscholz, who discovered and described the plant in 1815. Not only having its origins there, it also also became the state flower of California in 1890. It is quick to flower and will do so profusely for a long period of the summer until it sets seed. A real pleasure to have in the garden, especially in low-maintenance areas as it will just get on with doing its thing. *(Average seed count in regular packet - 150)*

THAI SILK APPLEBLOSSOM CHIFFON (ORGANIC) (XPCaTS) **£2.30**
Eschscholzia californica
A stunning and unique variety producing mainly double flowers of creamy rose and cranberry. This is a new variety for us and we really love it. It's a real show stopper. It flowers over a very long season, especially if picked or dead-headed. California poppies are drought tolerant so very low maintenance.

If using as a cut flower it acts as both filler and thriller due to its delicate lacy foliage. *(Average seed count in regular packet - 100)*

THAI SILK APRICOT CHIFFON (ORGANIC) (XPCAC) **£2.30**
Eschscholzia californica
A showstopping variety with incredible peach and apricot coloured blooms that look like they've been taken straight from a painting. It flowers over a very long season, especially if picked or dead-headed. California poppies are drought tolerant so very low maintenance. *(Average seed count in regular packet - 100)*

POPPY CORN

AMAZING GREY (ORGANIC) (XPoAG) **£2.10**
Papaver rhoeas
Mesmerising poppies with semi-doubled petals textured like vintage silk in stylish tones of stormy grey, delicate mauve and silvery white. These charismatic poppies float gracefully upon delicate stems providing a dreamy romantic atmosphere to your borders with a profusion of successional flowers. Whilst each flower is short lived, the statuesque seed pods can be admired long after the petals have scattered like confetti.
(Average seed count in regular packet - 500)

Poppy Corn continued...

ANGELS CHOIR (ORGANIC) (XPoAC) **£2.10**

Papaver rhoeas

A delightful poppy with ruffled blooms in a spectrum of soft pastels from white to grey, orange and pink. This variety offers a charming mix of single and double flowers that add a cheerful touch to the garden and vase alike with colours ranging from creamy white and blush pink to smoky lavender and warm orange. With its delicate and fleeting beauty and long flowering period, Angels Choir is a stunning addition to any space. Self-seeds easily and loved by pollinators. *(Average seed count in regular packet - 500)*

FIELD POPPY (ORGANIC) (XPo) **£1.98**

Papaver rhoeas

The classic field poppies are a favourite in gardens and fields in almost every part of the world. Single, cup-shaped flowers with brilliant red petals resembling crepe paper, poppy blossoms never disappoint! Low maintenance and fast flowering, they re-seed easily and come back year after year.

Flowering from June through to September, they're great in a meadow or wildflower garden. Plant them anywhere you want a bright splash of colour that will attract bees and other pollinating flowers. *(Average seed count in regular packet - 1350)*

MOTHER OF PEARL (ORGANIC) (XPoMP) **£2.10**

Papaver rhoeas

A beautiful mixed variety producing blooms of various dusty shades of plum, pink and white. This is a really eye catching variety, with such delicate colour shades. Some white with raspberry veining, some dusty pink, pale plum and white, on long elegant stems. *(Average seed count in regular packet - 500)*

POPPY ICELAND

PINK FIZZ (ORGANIC) (XPoS) **£1.95**

Papaver nudicaule

Eye-catching flowers with gentle fizzing tones of watermelon pink, white and apricot. These beauties are great as cut flowers or for filling borders with sumptous bursts of colour. this is a short lived hardy perennial often grown as a biennial here in the uk, flowering from June- August.

Best sown thinly under vermiculite or sand and watered from below as the seeds are very small, plant out as soon as 2 true leaves have formed, they do not like root disturbance so handle gently. *(Average seed count in regular packet - 350)*

RED SAILS (ORGANIC) (XPoRS) **£1.95**

Papaver nudicaule

A wonderful variety of Iceland Poppy with a profusion of bright red flowers all summer. With strong upright stems, this is a great variety for cutting and will produce flowers from the first year of sowing. *(Average seed count in regular packet - 250)*

RUDBECKIA

HIRTA (ORGANIC) (XRdHt) **£2.50**

Rudbeckia fulgida

A wonderful yellow variety producing an abundance of blooms over a long period. We love this rudbeckia for its bold and unashamedly golden yellow blooms. They are a real eye catcher and keep giving over a long season. *(Average seed count in regular packet - 500)*

SAHARA (ORGANIC) (XRdSa) **£2.50**

Rudbeckia fulgida

Stunning variety of Black Eyed Susan that produces single or double flowers with soft brown centres in glorious shades of caramel, copper and pink. The soft mix of colours of the blooms make this a great choice for the cutting garden. They pair beautifully with late summer blooms like amaranth and sunflowers. For maximum vase life pick when the buds are just about to open. *(Average seed count in regular packet - 100)*

SCABIOSA

BLACK KNIGHT (ORGANIC) (XScBK) **£2.45**

Scabiosa atropurpurea

Dark red almost black velvety blooms on long stems, a favourite in the flower garden. We were absolutely taken by this elegant flower with dark crimson and burgundy colours, sometimes really going into black with contrasting creamy white stamen. The flower heads make way for lovely seed heads with the shape of pin cushions.

This makes an amazing cut flower and can also be used as a dye flower, producing green and blue-purple dyes. *(Average seed count in regular packet - 50)*

SALMON QUEEN (ORGANIC) (XScSQ) **£2.45**

Scabiosa atropurpurea

A lovely scabious variety producing large salmon-pink heads. An easy to grow garden favourite, it's also a great variety for cutting, producing an abudance of double-petalled blooms on tall, upright stems throughout the summer. It's also great for pollinators, especially butterflies, making it a fantastic choice for any ornamental garden too. *(Average seed count in regular packet - 50)*

STERNKUGEL (ORGANIC) (XScSk) **£1.95**

Scabiosa stellata

A unique form of scabious bred for its delicate lantern-like seed heads. Sternkugel is the perfect choice for the dried flower enthusiast, producing beautiful pale blue pincushion flowes turning into decorative seed heads great for adding interest and sculpture to arrangements or bouquets. *(Average seed count in regular packet - 30)*

SNAPDRAGON

APPLEBLOSSOM (ORGANIC) (XSnA) **£2.25**

Antirrhinum majus

A stunning snapdragon variety producing spikes of single petalled blooms in varying hues of pink, peach and white. This has been a real show stopper and we've taken great delight in the variety of delicate colour combinations it produces and its popularity with pollinators. Appleblossom produces abundant long stemmed blooms perfect for cutting or fits delightfully in a cottage garden border. *(Average seed count in regular packet - 500)*

CANARY BIRD (ORGANIC) (XSnCB) **£2.25**

Antirrhinum majus

Cheery canary-yellow blooms on tall spires. Canary Bird produces abundant long stemmed blooms perfect for cutting as well as fiting delightfully in a cottage garden border. *(Average seed count in regular packet - 500)*

NIGHT AND DAY (ORGANIC) (XSnD) **£2.25**

Antirrhinum majus

Loved by bumblebees, this variety has velvety crimson petals with silver-cream throats, making a stunning display in borders and a perfect addition to cut flower arrangements. The foliage is dark compared to many other varieties, and the petals are a lesser known edible flower – great as a garnish on salads or as decorations on cakes. *(Average seed count in regular packet - 500)*

SPRINKLES

SPRINKLES (ORGANIC) (XPES) **£2.90**

Panicum elegans

An etheral, airy grass that adds structure and drama to any garden and arrangement. This is a fantastic variety for any cut flower enthusiast, producing abundant long stems and bonfire-like spray of delicate grass heads *(Average seed count in regular packet - 200)*

SUNFLOWER

FLORIS (ORGANIC) (XSuF) **£2.35**

Helianthus annuus

A beautiful multi-headed sunflower with blooms of crimson dappled with vanilla. Floris is a really special variety and all of our team are big fans! Each plant makes around eight blooms, reaching about 4-5 feet tall. As the season goes on the blooms show more vanilla colouring and take on a vintage hue. *(Average seed count in regular packet - 24)*

Sunflower continued...

GIANT YELLOW (ORGANIC) (XSun) **£2.20 - 4.00**

Helianthus annuus

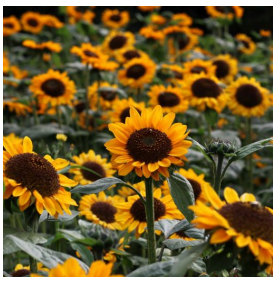

No surprises here! This is a sunflower that does exactly what it says on the tin. Tall and sturdy plants producing huge single yellow flowers. The flowers are much loved by bees and if you leave the plants over the winter they provide a valuable ecological role as winter bird food (the seeds) and a habitat for many insects (the stems). If you have heavy clay soil, incorporating the remains of the plants into the soil in spring will lighten the soil due its high carbon content. *(Average seed count in regular packet - 30)*

HOPI BLACK (ORGANIC) (XSHB) **£2.45**

Helianthus annuus

The Hopi Black Sunflower is a heirloom variety stewarded by the Hopi people who used it's dye in fabrics for basketry. Easy to grow and with a branching stems that can also be used for cutting, this variety is a wonderful addition to the dye and ornamental garden. Growing up to 3m in height with spectacular large flower heads, the seeds can be harvested to produce a beautifully rich dark purple dye. *(Average seed count in regular packet - 25)*

SONJA (ORGANIC) (XSuS) **£2.35 - 6.90**

Helianthus annuus

A wonderful multi-headed variety, particularly for cut flower use. This beauty has become a huge hit on the cut flower scene, producing around eight strong stems per plant. The blooms are a compact 10-15cm diameter, with striking with deep yellow petals and dark centres. The plants are fairly small, growing to around three or four feet tall. *(Average seed count in regular packet - 24)*

VANILLA ICE (ORGANIC) (XSuV) **£2.25**

Helianthus annuus

Multi branching variety with creamy lemon yellow blooms and dark centres. This is a special sunflower with lots of smaller, very pretty blooms. The pale lemon yellow colour deepening towards the centre which is a dark brown add a delicate touch as a cut flower and in bouquets. It makes a great garden plant too as it flowers over a long time. *(Average seed count in regular packet - 24)*

SWEET PEA

AZUREUS (ORGANIC) (XSPBl) **£2.10**

Lathyrus sativus

A sweet pea relative used as a filler in flower arrangements, with delicate green foliage and small blue flowers. Azureus produces an abundance of delicate and elegant green foliage with feathery tendrils. The flowers are small and odourless, and while the stems are too small to be cut as individual stems, the buds on the cut branches will continue to flower for a week or more if placed in a vase of water.

Very easy to grow and can survive drought conditions. *(Average seed count in regular packet - 23)*

Sweet Pea continued...

CASTLEWELLAN (ORGANIC) (XSPCw) **£2.95**

Lathyrus odoratus

A long-stemmed sweet pea variety producing delicate blooms in a peach-blush. Castlewellan's blooms are sweetly scented and the plants have a long flowering season and a vigourous growing habit. Perfect for cutting with a vase life of up to 5 days. *(Average seed count in regular packet - 23)*

ENCHANTE (ORGANIC) (XSPEn) **£2.95**

Lathyrus odoratus

Beautiful delicate multicoloured blooms opening creamy green and progressing through pink to pale mauve. This Fred's favourite sweet pea variety. The colour show when they are in full bloom is no less than spectacular. Each flower head is a rainbow of different colours, and the smell is intoxicating! *(Average seed count in regular packet - 23)*

JILLY (ORGANIC) (XSPJi) **£2.95**

Lathyrus odoratus

A beautiful and highly productive sweet pea producing an abundance of delicate cream blooms. This is Ronja's favourite sweet pea of 2023, producing a huge amount of incredible blooms, the performance was incredible and beautiful in its simplicity. The scent of the flowers wafting through the field in July brought a very special feeling to the patch and we were sad to see the blooms go. Luckily they were followed by lots of plump seed pods which we were equally excited about as now we can offer this variety to you! *(Average seed count in regular packet - 23)*

NIMBUS (ORGANIC) (XSPNi) **£2.95**

Lathyrus odoratus

A striking flake variety with maroon-grey speckles on a white background. Nimbus is a real show-stopper variety producing a mass of bicolour blooms on very long stems. The petal edges have a dark maroon strip and their scent is delicious. Definitely a must-have variety. *(Average seed count in regular packet - 23)*

PAINTED LADY (ORGANIC) (XSPL) **£1.95**

Lathyrus odoratus

Painted Lady is bi-coloured and sweet scenting with delicate pink and creamy white flowers. It is one of the oldest sweet pea varieties and has been grown in England for centuries. It makes a great cut flower and is a delight for every garden. *(Average seed count in regular packet - 30)*

New for 2027

RESTORMEL (ORGANIC) (XSPRs) **£2.95**

Lathyrus odoratus

A long-stemmed sweet pea variety producing long-stemmed large blooms in a scarlet hue. Restormel's blooms have a delicate scent and the plants have a long flowering season and a vigorous growing habit. Perfect for cutting with a vase life of up to 5 days. *(Average seed count in regular packet - 23)*

VERBENA

VANITY (ORGANIC) (XVeVa) **£2.65**

Verbena bonariensis

Vanity is a slightly more compact variety, making it great for small gardens or containers. A perrenial flower that should be found in every cottage garden, not just for it's beautiful tall stems and delicate movement but also it's attraction to pollinators. This specific variety has been said to have petals in a slightly more vibrant hue and will flower from June - October. *(Average seed count in regular packet - 200)*

VIOLA

VIOLA / WILD PANSY (ORGANIC) (XVi) **£2.30 - 3.20**

Viola tricolor

Viola tricolour, also known as wild pansy or heartsease, are small plants flowering throughout the season from April to September. They're hardy, frost tolerant and self-seed easily. It is a delightful perennial that grows well in shady areas, beds, containers, rock gardens, edges, even walls and makes a beautiful cut flower.

It's not just a charming beauty for its looks, it is also edible making the most beautiful garnish or addition to salads. *(Average seed count in regular packet - 500)*

WELD

WELD (ORGANIC) (XWld) **£2.15**

Reseda luteola

Tall spires of yellow green flowers, well known dye plant also great as cut flower. Weld aka Dyers' Rocket is native to Europe and historically used as a dye plant for making a bright brilliant yellow. It may even be one of the oldest dye plants known about.

We enjoyed it as a cut flower too with unusually shaped tall slender spikes of tiny pretty yellow green flowers adding texture to any bouquet. *(Average seed count in regular packet - 500)*

YARROW

PARKERS VARIETY (ORGANIC) (XYaYe) **£2.25**

Achillea filipendula

A wonderful variety of Achillea with tall, upright stems and large sunshine yellow umbels. This vigorous perennial is a fantastic addition to the garden, giving abundant blooms throughout summer and adding drama to the back of a border. This variety also works brilliantly as a cut flower with exceptional stem length. *(Average seed count in regular packet - 350)*

SUMMER BERRIES (ORGANIC) (XYaSB) **£2.25**

Achillea millefolium

A breath-taking rainbow of pastel shades including buttercream, peach, coral, blush and raspberry. This is a truly stunning yarrow mix and such a joy to grow. Predominantly gentle shades punctuated by the occasional magenta shock.

Ideal for cutting due to their very long stems and vase life of up to 7 days. *(Average seed count in regular packet - 350)*

Yarrow continued...

YARROW (ORGANIC) (ZYa) **£2.10**

Achillea millefolium

A distinctive hardy perennial plant, with a long history of medicinal use around the world. It is also an ingredient in biodynamic compost preparations, and the beautiful white flowers are lovely as a cut flower which are also very attractive to pollinators. This is the wild white flowered variety with occasional hints of pink. Other common names include 'Nosebleed', and 'Carpenter's Weed' reflecting its traditional use in wound healing. Yarrow has a remarkable ability to grow happily in a mown lawn, meadow or garden beds. It can be mown and remain low, but may grow up to 60 - 90cm tall in the right conditions *(Average seed count in regular packet - 1000)*

ZINNIA

CARROUSSEL (ORGANIC) (XZiC) **£2.60**

Zinnia elegans

(Average seed count in regular packet - 75)

DWARF MIX PINK (ORGANIC) (XZiD) **£1.85**

Zinnia elegans

This dwarf mix of Zinnias grow to around 30cm tall. They produce blooms of varying shades of pink, adored by bees and butterflies. We love to plant zinnias in among our vegetable crops. The dwarf varieties take up less space but are equally beautiful to their taller cousins. *(Average seed count in regular packet - 100)*

QUEEN BLUSH LIME (ORGANIC) (XZiBL) **£2.65**

Zinnia elegans

A truly unique zinnia producing blooms of lime green and purple. This stunning variety is really quite other-worldly. There are not many flowers which are green but this is one and it quite remarkable.

The green flowers are blushed with contrasting purple, creating a zingy electric effect. A real show-stopper! *(Average seed count in regular packet - 75)*

TIDEPOOL (ORGANIC) (XZiT) **£2.60**

Zinnia elegans

Tidepool produces an incredible mix of large, vibrant blooms with striking jewel tones and amazing anemone-like petals. We have been overjoyed observing this variety grow in our polytunnels. It has produced tall stems all summer long and is a must-grow for any cut flower enthusiast. *(Average seed count in regular packet - 50)*

Zinnia continued...

ZINDARELLA PEACH (ORGANIC) (XZiP) **£2.65**

Zinnia elegans

Stunning scabious-flowered variety producing blooms of creamy peach, salmon and apricot. This beautiful variety is a new favourite for us. Its delicate colour palette and long strong stems makes it ideal for bouquets. *(Average seed count in regular packet - 75)*
